

ONC Additional Types of Costs

Any additional types of costs may also apply for implementing specific capabilities of the system.

170.315(h)(1) - Direct Project (Direct Secure Messaging)

Description: Direct Project is a set of standards and protocols that enables simple, secure, and standards-based exchange of clinical messages (e.g., referrals, care summaries, discharge summaries) between trusted health care providers, regardless of the EHR systems they use.

Type of Costs: One-time setup cost and annual fee per staff using Direct Project
