DATABAHN

SIEM Evaluation SIEMplified

Choosing the right SIEM for your SOC is a critical decision, but the complexity, cost, and effort of running multiple evaluations are a cause of concern for CISOs and security leaders.

Discover how to make SIEM evaluations faster, easier, and more effective with DataBahn.

The Challenge of Evaluating Multiple Vendors

INTEGRATION EFFORT

Teams must configure resource-intensive data ingestion and transformation workflows just for evaluation, and need to identify data to use for evaluation.

VARIED SIEM FORMATS

Each SIEM vendor requires data in different formats, some demand proprietary structures, and others have specific transmission protocols.

SIDE-BY-SIDE COMPARISON

SOCs must choose between testing one or two sources or across their entire infrastructure, trading convenience for incomplete comparisons.

DataBahn: Your Solution for Effective SIEM Evaluation

DataBahn seamlessly routes data from your existing data pipelines in real-time to the new system(s). This allows organizations to compare the effectiveness, performance, and functionality of different SIEM solutions within a controlled environment.

Using DataBahn's Security Data Fabric delivers the following outcomes for SOCs evaluating SIEMs

66%

Faster evaluation of SIEMs due to synchronized evaluation and seamless integrations

80%

Lower effort in SIEM evaluation due to support for all SIEM formats and for on-prem & cloud

60%

Higher evaluation accuracy due to comprehensive, simultaneous evaluation of SIEMs directly

How **DataBahn** SIEMplifies SIEM evaluation

Evaluating SIEMs shouldn't be difficult–and with DataBahn, it's easier, faster, simpler and more effective.

1 HEAD-TO-HEAD EVALUATION

Compare SIEM performance simultaneously in real-time, to compare the effectiveness, performance, efficiency, and functionality of SIEMs at the same time. This eliminates the need to sequentially evaluate the SIEMs, and enables objective evaluation of functionality.

OUTCOME: *Faster and clearer analysis*

SIEM 1
SIEM 2
SIEM 3

2 DATA GENERATOR

DataBahn generates dummy security data from your varied data sources so you can compare SIEM performance directly–without compromising the security and privacy of your production data. This enables you to evaluate your SIEM effectively without impacting security.

OUTCOME: *Evaluate SIEMs without endangering security*

SIEM 1
SIEM 2
SIEM 3

3 OUT-OF-THE-BOX CONNECTORS

Connect your sources, data pipelines and infrastructure to multiple SIEMs with ease with our **400+** out-of-the-box connectors for a wide variety of tools. Our product also supports integration with custom applications, saving you engineering effort and bandwidth.

OUTCOME: *Fast integrations to accelerate SIEM evaluation*

4 TESTING FLEXIBILITY

Make it easier to assess different SIEMs with complete support for all relevant formats, and for different types of SIEM deployments–on-premise, cloud, and hybrid–so that you get the flexibility, speed, and simplicity you need to focus on identifying the right SIEM for your SOC.

OUTCOME: *Flexibility and simplicity in assessing SIEMs*
