

Instant job dispatch & response.

Enables monitoring centres and patrols to send job data both ways across multiple sites.

Easy integration: Send to/Receive from Patriot Systems or other compatible platforms.

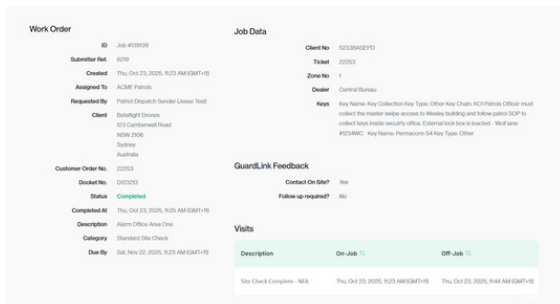

The Smarter Way to Manage Dispatch Jobs

GuardLink is a secure, cloud-based solution that enables job senders (Monitoring Centres and Control Rooms) and responders (Patrol Companies) to instantly communicate dispatch job data - faster, more accurately and with less overhead. GuardLink delivers significant time savings for operators whilst enabling full circle audit capability, including the ability for responders to transfer evidence capture seamlessly.

For Senders (Monitoring Centres):

- Assign preferred dispatch centres to sites/accounts.
- Send job requests with job details, ticket numbers, client information, and key details instantly to the preferred responder.
- See real-time responses without follow-up calls or the need to check emails.

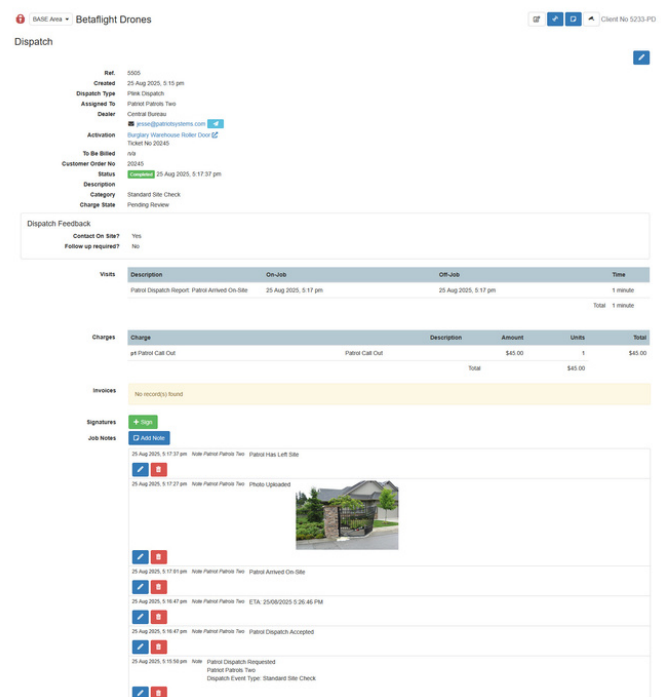

For Responders (Patrol Company):

- Receive dispatch requests instantly from any GuardLink Sender.
- Accept, reject, cancel, and complete jobs.
- Provide updates with notes, docket numbers, onsite and offsite times, signatures, and photos.
- Use Permaconn Connect (web portal) or other integrated platform.
- Permaconn Connect includes dashboard and features for easy job management.

Key Features

- Instantly Share Job Detail**
Photos, notes, visit onsite and offsite times, forms & signatures shared instantly.
- Cross-Platform Compatibility**
GuardLink connects Patriot Systems, third-party platforms, and Permaconn Connect seamlessly.
- Simple for Senders**
Operators have one simple interface to dispatch jobs. There is no need to pick up the phone, open additional web portals, or know how to use multiple UIs.
- Permaconn Connect**
Simple, web based, interface for managing job dispatches and responses.
- REST API**
Integrate any third-party platform to send and receive jobs.
