

**CLIENT:
LOCAL AUTHORITY**

**SCOPE:
FIRE DOOR REPLACEMENT**

**VALUE:
£70,000.00**

OCTOBER 2024

FIRE DOOR REPLACEMENT

Scope of Delivered works

- Replacement of fire doors throughout the school main building
- Removal of existing doors via licensed waste carrier
- All doors provided with third party accreditation (BM TRADA)
- All ironmongery and door signage included

Challenges

- **Limited Timeframe** – Occupied school so all works carried out during out of hours or weekends
- **Coordination with School Staff** – Communicating effectively to ensure availability of areas to facilitate works and avoid external bookings
- **Security & Site Management** – Keeping the site and other building users safe while work is carried out.

FIRE DOOR REPLACEMENT

Benefits to end user

- **Enhanced containment:** Modern fire doors are more effective at containing fires, smoke, and heat, giving occupants more time to evacuate.
- **Reduced maintenance:** Modern doors and frames are more durable and often easier to maintain.
- **Better insulation:** New doors provide improved thermal and acoustic insulation, helping with heating costs and classroom noise levels.
- **Lower risk profile:** Upgraded safety measures can reduce liability in case of a fire and potentially lower insurance premiums.
- **Professional appearance:** New fire doors can refresh the school's look and contribute to a safer, more modern environment.

Client Feedback

"The team at UKHUB provided professionalism throughout, taking care and consideration to the staff and students at all times. Would highly recommended to others and look forward to working with them in the future"

– Chi Da Silva (Contracts Manager)
