

## Capability Statement

Strategic Surface Solutions is a woman and minority-owned company founded on a wealth of experience gained from driving success within the industrial coatings and corrosion mitigation sector - with a hyper focus on Surface Preparation. Over the course of my career, I have played a pivotal role in the growth and profitability of multiple companies, leveraging my deep understanding of surface preparation and corrosion control. My objective is to be a leading provider of well-rounded and innovative solutions around surface preparation to assist with corrosion mitigation. Strategic Surface Solutions offers a comprehensive range of expertise, products, and services to address the unique challenges faced by various industries.

### Key Capabilities:

#### Surface Preparation Expertise:

Our team has a deep understanding of best practices for surface preparation techniques, including abrasive blasting, robotics, and various chemical cleaning.

We have an extensive knowledge of industry standards and specifications, including AMPP (NACE & SSPC) and ISO.

Hold Chair and Vice-Chair positions within the industry's standards for Surface Preparation.

#### Product Solutions:

Sourcing and supply of high-quality abrasives, such as garnet, nickel slag, steel grit, etc., for optimal surface profile and cost-effectiveness.

Access to a variety of corrosion inhibitors, from traditional to cutting-edge technologies.

Selection and supply of high-performance protective coatings, including epoxies, polyurethanes, and specialty coatings.

Provision of industrial equipment for surface preparation, such as blast cabinets, abrasive recovery systems, and surface profiling tools.

#### Service Offerings:

Comprehensive surface preparation assessments and audits.

Development of customized surface preparation specifications and procedures.

Project management and supervision for complex surface preparation projects.

Training and education programs for industry professionals.

Protective Coatings Specialist (PCS) Services

Facilities and Atmospheric Corrosion Surveys

Quality Control Program Development

Government Experience:

Proven track record of successful collaborations with government agencies, including the DOD, Army Corps, and NAVSEA.

Experience in high profile R&D projects, focused on advancing surface preparation technologies and solutions.

**Our Commitment:**

**Quality and Reliability:** We are dedicated to delivering high-quality products and services that meet or exceed industry standards.

**Customer Satisfaction:** We prioritize customer needs and strive to build long-term partnerships.

**Innovation:** We continuously explore and implement new technologies and best practices to improve corrosion mitigation outcomes.

Let us help you optimize your surface preparation processes, enhance the durability of your assets, and reduce the costs associated with corrosion.

Contact us today to discuss your specific requirements!
