

2026 M1 Concourse Convertible/Open Cockpit Policy

Any convertible or open cockpit vehicles driven on the track must have a factory-installed rollover protection system or a roll cage installed. All convertible vehicles are recommended to be driven with the top up. Arm restraints are recommended for open cockpit vehicles and for those choosing to drive with a convertible top down.

All convertible and open cockpit vehicles must pass the "Height Clearance Test." The driver and passenger (if applicable) must be one inch (1") or more below the roll bar or factory protection system with their helmet on. If this requirement is not met, the vehicle is prohibited from on-track activities.

It is the full responsibility of the Club Member or guest driver to ensure their convertible has a rollover protection system or a roll cage installed.

The following list contains vehicles known to have factory-installed rollover protection. M1 Concourse does not guarantee its accuracy.

List of vehicles known to have factory rollover protection (as of 2026):
