

Are you an unpaid caregiver for someone living with dementia in Canada?

Researchers from the University of Victoria want to hear from you!

You can help by taking part in an online study about caregiver resilience, which means the ability to adapt, grow and do well even when facing tough situations.

We hope that the results of this study will help create better supports and services for caregivers.

The study includes 2 parts:

- (1) online survey (~45-60 minutes)
- (2) optional online cognitive tasks (similar to brain games; ~30 mins)

Study Payment:

\$15 gift card of your choosing for completing OR the survey

\$25 gift card of your choosing AND raffle entry for prizes up to \$500 for completing the survey and cognitive tasks

Interested? Contact us at resilientcarestudy@uvic.ca or scan the QR code to set up a 5-10 mins screening phone call.
