

An aerial photograph of a river with multiple sharp meanders flowing through a dense, green forest. The river's path is highly irregular, creating several large loops and islands of land. The water reflects the sky, and the surrounding forest is thick and vibrant green. The overall scene is a natural landscape with a prominent water feature.

Longer Description

Meander Magazine is a seasonal print magazine exploring regenerative culture, bioregional ways of living, and the creative possibilities of slowing down.

In an age of speed and disconnection, Meander invites readers to return to the rhythms of land, season, and story. Each issue offers long-form features, guides, interviews, artwork, and field notes from practitioners and communities around the world — from farmers to poets, architects to foragers.

Help bring Meander Magazine to life! Here is how:
