METAL FINISHES
STEEL // POWDER COAT

COBALT RAL 5002

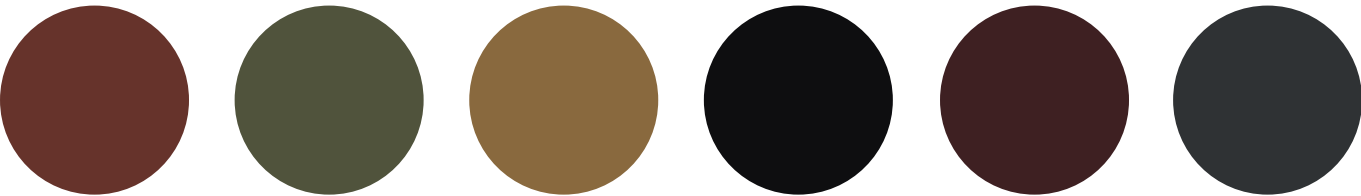

ABOUT

Steel contains a significant proportion of recycled content and is fully recyclable at end of life. Its long lifespan and minimal maintenance needs contribute to a lower environmental footprint.

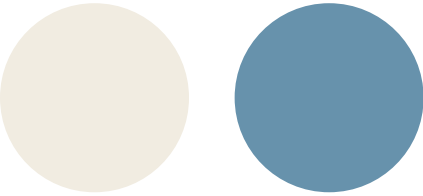

As a high-strength alloy, steel is valued for its rigidity, wear resistance, and load-bearing capacity, making it ideal for structural frames in furniture. It is finished with a solvent-free powder coating that enhances surface durability and provides corrosion resistance without VOCs.

AMERICAN WALNUT

ABOUT

A family-run business with a rich history, specialising in the production of wooden moulded parts since their establishment in 1927.

Their unwavering commitment to quality is evident in the production of high-quality moulded seat shells and parts. Using exclusively FSC-certified wood sourced from sustainably managed forests located in close proximity to their factory.

TOP FINISHES
FORBO LINOLEUM

PISTACHIO

ABOUT

We laminate our linoleum to a bamboo core and this can be seen on the edge of the table top, in either a light caramel or black lacquered finish.

Forbo's Linoleum is a natural, climate-positive surface material crafted for durability, elegance, and environmental responsibility. Made from renewable raw materials like linseed oil, wood flour, pine rosin, and limestone, it offers a refined matte finish and soft tactile quality, ideal for furniture and interior surfaces.

What sets it apart is its carbon-negative profile: the biobased ingredients absorb more CO2 during growth than is emitted during production and transport. Each square metre of Furniture Linoleum actively removes 456g of CO2 from the atmosphere, making it a smart, sustainable alternative to synthetic surfaces.

MATERIAL CONTENT

Recycled: Linseed oil, gum rosin, wood flour and felt paper

ENVIRONMENT

Bamboo linoleum uses ISO 14021 and EN15804 self-declared certification.

HPL POLYREY COLOUR(LAMINATE)

BLEU POUDRÉ

ABOUT

Polyrey HPL® is a durable and versatile surface material designed for high-performance interiors. With its non-porous finish and resistance to impact, wear, and moisture, it offers lasting performance in both residential and commercial spaces, making it a practical and low-maintenance choice for furniture and wall surfaces.

Its long lifespan contributes to reduced material waste over time, while its primarily paper-based composition makes use of renewable resources. Thanks to its low emissions and antibacterial properties, it also supports healthier indoor environments.

GREENLAM AFX LAMINATE(ANTI-FINGERPRINT)

TWILIGHT BLUE

9860

ABOUT

Greenlam AFX is a high-performance, ultra-matte laminate designed for modern interiors, offering a soft-touch finish that resists fingerprints, smudges, and scratches. Ideal for both vertical and horizontal applications such as cabinetry, furniture, and wall panels, it combines aesthetic elegance with functional durability. Its surface is not only easy to clean and low-maintenance but also features thermal healing properties that allow minor scratches to be repaired with heat.

Environmentally conscious, it is available with GREENGUARD Gold and FSC® certifications, making it a smart choice for sustainable interior design.

CORE MATERIALS
VALCHROMAT

BLACK

ABOUT

When sourcing our top finishes, we pay particular attention to the core material that we laminate it to, we have chosen Valchromat due to its responsible production.

Valchromat is a responsible and innovative material designed with sustainability at its core. Made from forest waste, sawmill residues, and low-value wood species, it reduces waste while maximising natural resource use.

Valchromat uses organic dyes and custom resins for durability without losing recyclability. Unlike MDF, it resists moisture, offers greater strength, and allows precise machining with minimal finishing. Its integrity and low tool wear help cut waste, chemicals, and industrial impact.

MATERIAL CONTENT

Recycled wood fibres: 100%
individually dyed with organic pigments and bonded with a specially developed resin.

ENVIRONMENT

Valchromat uses FSC® Certified wood fibres and holds key certifications, Declare, Red List Approval, Greenguard Gold, EPD, and HPD.

CARAMEL

ABOUT

When sourcing our top finishes, we pay particular attention to the core material that we laminate it to, we have chosen Bamboo due to its sustainable and low carbon credentials

Made from the extremely rapidly renewable giant bamboo species “Moso”, renowned for its CO2 absorbing and O2 producing capacity. Abundantly available in China (approx. 7 mio ha) and always sourced from sustainably managed forests and plantations. The Moso bamboo plant consists of multiple stems. As a result, several stems may be harvested each year without killing the mother plant.

MARBLE

ROSSO LEVANTO

ABOUT

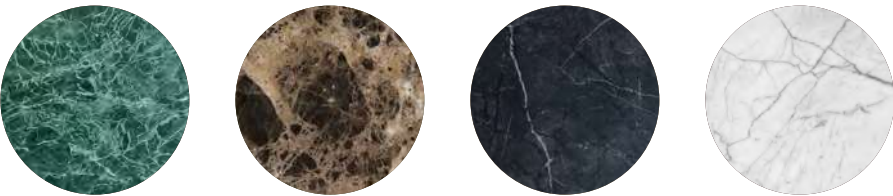

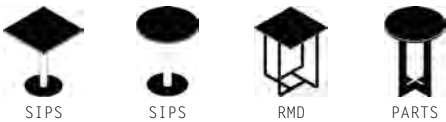

Marble is a timeless natural material that brings depth, elegance, and individuality to every surface. Each slab is unique, shaped over centuries, and carefully sourced with sustainability in mind.

At DEKA, we use marble that is treated with a light, low-impact sealer to improve stain resistance without compromising the stone's natural character. Because it's a durable, long-lasting material, marble supports a more circular approach to design – built to be maintained, restored, and appreciated for generations.

GLASS FINISHES
BACK PAINTED

REDDISH RAL 8012

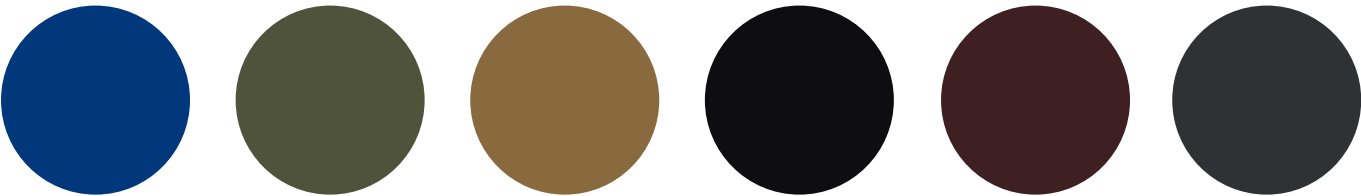

ABOUT

Glass is produced from natural raw materials, primarily sand, and is fully recyclable without loss of quality. It can be remelted and reused indefinitely, supporting circular material use and waste reduction. Valued for its hardness, smooth surface, and resistance to staining or chemical damage. Here, the glass is back-painted using a range of RAL colours to match design needs.

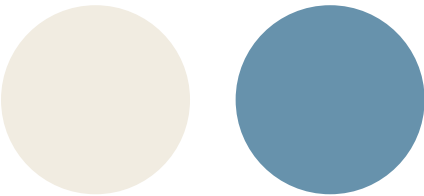

In addition - the spacing on some pages doesn't work and it might be worthwhile left-aligning everything for consistency. I know that'll change a lot about the layout so let me know your thoughts.

SVENSSON_WOW RE

3127

ABOUT

Wow RE is an expressive upholstery fabric with subtle patterning that creates dynamic effects. The soft chenille yarn provides a welcoming feel and a durable surface, ideal for environments like healthcare, care facilities, and schools.

Made with 73% recycled Trevira CS, the fabric is both sustainable and washable at 60°C.

MATERIAL CONTENT

Recycled Trevira CS: 73%
Trevira CS: 27%

ENVIRONMENT

Oeko-Tex ® Standard 100, Trevira CS Eco and EU Ecolabel.

FIRE RATING

Meets EN1021-1 standards for cigarette ignition resistance. Conforms to EN1021-2 for match ignition safety.
BS5852 Ignition source 5 compliant.

ABOUT

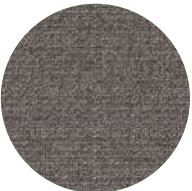

Maharam’s M Series consists of multipurpose textiles in over 400 colours. This collection of solids represents one of the design studio’s greatest strengths: combining elevated aesthetics and performance at a practical price.

M’s offers recycled content, abrasion resistance, bleach cleanability, and short lead times. Maharam periodically refreshes the palettes of these perennial textiles to ensure their continued relevance.

FIRE TREATMENT

ABOUT

Celebrating the warmth, refinement, and resilience of natural fibres, Maharam’s comprehensive series of wool upholstery highlights the environmental, aesthetic, and performance benefits of wool through an extraordinary breadth of colour and soft textures.

To achieve the unique aesthetic range, the design studio worked with specialised resources in historic textile regions throughout the world. Building upon wool’s reduced environmental impact as a rapidly renewable resource, the studio opted to avoid added chemical finishes and incorporate recycled content wherever possible.

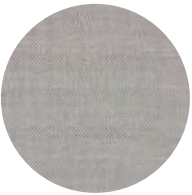

FIRE RATING

Meets EN1021-1 standards for cigarette ignition resistance. Conforms to EN1021-2 for match ignition safety.

Recycled content Yarn type: Worsted yarn.

ABOUT

Re-wool is an upholstery textile made with 45% recycled wool, spun from post-industrial fibre scraps collected at Kvadrat’s Wooltex mill. This closed-loop process ensures consistent high quality while reducing wool waste to near zero.

Designed by Margrethe Odgaard, its colours are inspired by Scandinavian light transitions, with new saturated tones enhancing the melange warp. The result is a rich, textured surface that resembles fine embroidery.

FIRE RATING

KVADRAT_HALLINGAL

0420

ABOUT

Kvadrat’s first textile ‘Hallingdal’ has become the archetype of woollen textiles. The very durable upholstery fabric was originally designed in 1965 by Nanna Ditzel, and is now available in a version with an updated colour scale: Hallingdal 65.

Hallingdal 65 is made of wool and viscose, which complement each other well: the wool provides excellent durability and flexibility, whilst the viscose adds brilliance and depth to the colour. Both materials are dyed before they are spun, which highlights the rich texture of the fabric.

MATERIAL CONTENT

New wool: 70%
Viscose: 30%

KVADRAT_CANVAS

ABOUT

Canvas is a vibrant woollen upholstery textile created by Giulio Ridolfo. Particularly well-suited to large surfaces thanks to its pronounced structure, it features a soft weave and an expanded palette inspired by the landscapes of Skagen, Denmark.

The melange yarn used to craft Canvas combines three colours, with six hues in every colourway. Consequently, the textile offers exceptional colour richness and an intriguing expression. From a distance, it has the calm surface of a unicoloured textile. But, get closer, and shimmering colour nuances, delicate contrasts and an elegant structure emerge.

ABOUT

The second design by Vincent van Duysen and Anna Vilhelmine Ebbesen is the distinctive upholstery fabric Moss. The mixture of twisted yarn and chenille gives the fabric surface a textured structure with an appearance of movement, and also creates a soft handle which adds a special dimension to the furniture it covers.

The twenty-two colourways are either one- or two-tone combinations inspired by Vincent van Duysen’s own home and range from cool cement and soft blue to oily green, curry yellow and the shades of natural wood.

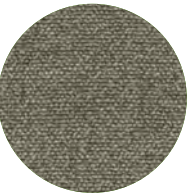

FIRE TREATMENT

ABOUT

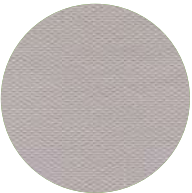

Serpentine is a voluminous woollen upholstery textile by colour expert Giulio Ridolfo, blending Kvadrat’s heritage with a contemporary touch. Crafted using thick, soft wool yarn from Kvadrat’s Norwegian mill and inspired by double Ikat weaving, it creates rich texture and dynamic colour interplay.

Ridolfo’s refined colour system contrasts vivid warp hues, influenced by his travels to Mexico, with subtle tones in the weft, resulting in 12 vibrant colourways. With its unique construction, Serpentine combines aesthetic depth with strong performance, making it ideal for both commercial and residential spaces.

ABOUT

Paul Smith (b. 1946, United Kingdom) is a designer of mens- and womenswear with an enthusiasm for wide-ranging cultural references and idiosyncratic combinations of pattern and color, applied with understatement.

His ability to combine a flair for eccentric detail with a dedication to the highest standards of craftsmanship has made him among the most successful fashion designers in British history. For the past twenty years, Smith and Maharam have collaborated to generate over forty textiles that reinterpret classic motifs through idiosyncratic applications of color, pattern, and scale.

ABOUT

Maharam’s Textiles of the 20th Century series pays homage to the great multidisciplinary designers of the last century, whose timeless work has been faithfully reproduced to meet modern performance requirements, ensuring their ongoing legacy.

Trained as an architect but proficient in nearly all design disciplines, Alexander Girard (1907-1993, United States) had a profound impact on 20th-century visual culture. As founding director of Herman Miller’s textile division from its formation in 1952 until 1973, Girard explored wildly different approaches to colour, form, pattern, and construction that due to their fundamental qualities of beauty and usefulness, remain relevant today.
