

THE FUTURE OF HEALTH DATA SUMMIT

Hosted by datavant

Agenda

Tuesday, October 28, 2025

The Fairmont Washington D.C. Georgetown

7:30 – 8:30 AM Breakfast & Registration

8:30 – 8:45 AM Opening Remarks

Speaker: **Kyle Armbruster**, CEO, Datavant

8:45 – 9:30 AM Care 2030: AI, Data, and the Patient Experience Ahead

How AI and new technology will transform healthcare for everyone from Patients to Providers to Researchers and Regulators

Moderator: **Kyle Armbruster**, CEO, Datavant

Speaker: **Seema Verma**, EVP and GM, Health and Life Sciences, Oracle

9:30 – 10:15 AM Value-Based Care: Time for the next act, or fundamentally refactor our approach?

Value-Based Care has had many forms and names, arguably over the past two the three decades. Over that period of time, regulatory changes helped to shape what appears to be a more sustainable model – we will discuss the current state of affairs, and what will be necessary to support VBC (or a newly named iteration) success over the long run. Notably, we will focus on what payers and the broader healthcare ecosystem learned via the market “reset” over the past two years, and the how data liquidity and scaled AI can help to ensure this success.

Moderator: **Sachin Patel**, GM Payer, Datavant

Speakers: **Michael Meucci**, CEO, Arcadia
David Pierre, CEO, Machinify
Farzad Mostashari, MD, CEO, Aledade

10:15 – 10:45 AM Networking Break

10:45 – 11:30 AM Innovation by Design, Privacy by Default: Protecting and Using Health Data

This panel will explore the friction between data protection and data use and discuss how stakeholders balance privacy and progress in healthcare innovation. Our discussion will examine:

- *How evolving AI models amplify both the promise and the risks of healthcare data use*
- *Where privacy law, ethical frameworks, and real-world practices align—or conflict*
- *How “de-identification” and “consent” play out as guardrails in a world of health AI, analytics, and seemingly infinite data use initiatives*
- *Practical approaches to balance compliance, trust, and innovation in health data ecosystems*

Moderator: **Alya Sulaiman**, Chief Compliance & Privacy Officer

Speakers: **Robyn Eckerling**, Chief Privacy Officer, Tempus AI
Roshal Marshall, Chief Privacy Officer, Verily
Aliza Silver, Sr. Dir. Health Policy and Gov’t Affairs, Oracle
Deven McGraw, Chief Regulatory and Privacy Officer, Citizen Health

11:30 – 12:15 PM **Reimagining Mental Health Care: Evidence and Insights on Psychedelic Therapies**

Bringing together leaders at the forefront of research, clinical practice, and lived experience to explore the role of psychedelics in treating mental health conditions.

In this discussion, Marcus Capone of TARA Mind, Dr. Brandon Weiss of Johns Hopkins, Dr. Dan Karlin of MindMed, and TBD will share diverse perspectives on the science, practice, and future of psychedelic-assisted therapies. Together, they will examine emerging evidence, clinical applications, and the challenges of integrating these treatments into mainstream medicine.

Moderator: **Claire Manneh**, Datavant

Speakers: **Marcus Capone, MBA**, Founder, TARA Mind
Brandon Weiss, PhD, Associate Professor, Johns Hopkins
Dan Karlin, MD, CMO, MindMed
Lynnette Averill, PhD, Associate Professor, Co-Director, Ethical Legal Implications of Psychedelics in Society (ELIPSIS) Program, and Director, Emerge Research Program, Baylor College of Medicine

12:15 – 1:30 PM **Lunch**

1:30 – 2:15 PM **From Burden to Breakthrough: Unlocking Value with Digital Automation**

Healthcare organizations are facing mounting pressures—rising administrative costs, workforce shortages, and growing demands for interoperability. Too often, these challenges burden providers, payers, and patients alike, straining resources and slowing innovation.

This session explores how digital automation is transforming these burdens into breakthroughs. From unlocking value with automated data exchange to reducing manual processes and improving data accuracy, digital tools are creating new efficiencies and unlocking value across the healthcare ecosystem. These innovations streamline workflows, support compliance, and ultimately enhance patient outcomes.

Attendees will gain insights into real-world use cases, learn how leading organizations are deploying automation at scale, and discover practical strategies to maximize impact while maintaining quality of care.

Join this discussion led by Steve Mallinak President and GM of Datavant's Provider business and featuring Judson Ivy, CEO Ensemble Health Partners, Shiv Rao, Founder and CEO Abridge, Kyle McElroy VP Clinical Operations Tenet Health, Christine Cunningham HIM Director UWHealth to see how the shift from burden to breakthrough is not just possible—it's already happening.

Moderator: **Steve Mallinak**, GM Provider, Datavant

Speakers: **Shiv Rao**, Founder & CEO, Abridge
Kyle McElroy, VP HIM Operations, Tenet
Christine Cunningham, Director of HIM, UW Health
Jim Gaffney, Chief Strategy Officer, Ensemble Health Partners

2:15 – 3:00 PM	Investment to Outcomes: Driving Change in Healthcare Through Capital Deployment <i>The healthcare industry is at a critical inflection point, where access to capital and strategic investment decisions can unlock meaningful transformation. This panel brings together leading investors to explore how funding trends are shaping the healthcare landscape and the ways in which capital deployment can accelerate innovation.</i> Moderator: Shannon West, Chief Strategy Officer, Datavant Speakers: Matt Holt, Managing Director, NMC Bill Geary, Co-Founder & GP, Flare Capital Sofia Guerra, VP, Bessemer Ventures
3:00 – 3:30 PM	Networking Break
3:30 – 4:15 PM	Applied AI: Considerations, Guardrails and Successful Deployment <i>AI is set to reshape how we think about everything, from business insights to how we interface with our wearable devices. In this session, we'll hear from technologists and government officials who will share their perspectives on how AI has been built into their products, the safeguards and frameworks they leveraged to get to market, how to make sense of the data and how the data behind AI is being protected.</i> Moderator: Arnaub Chatterjee, GM LS, Datavant Speakers: Dan Sheeran, VP & GM, Healthcare & Life Sciences, AWS Jacob Shiff, Chief AI & Technology Officer, CMS Freddy Abnoui, VP Health Technology, Meta
4:15 – 5:00 PM	Trust, Transparency & The Patient <i>How do we earn and keep patient trust in a world where data is constantly shared and analyzed? This session brings together leaders from life sciences, providers, and payers to explore what transparency really looks like in practice. From consent models and privacy-preserving technologies to clear communication and responsible data use, we'll unpack the strategies that build confidence and protect the patient relationship.</i> Moderator: Sheila Thomas PharmD, RPh, AVP & GM, CVS Healthspire Life Sciences Solutions Speakers: Jennifer Blumenthal, Product Director, OneRecord, at Milliman IntelliScript Sarah Ginnetti, CRO & VP Of Clinical Revenue, UCONN Health Kristen Valdes, Founder & CEO, b.well Connected Health Jeff Yoshimura, Chief Product Officer, Personify Health
5:00 – 5:30 PM	Building the Future of Healthcare Data: A Conversation with Amy Gleason Speakers: Robert Musslewhite, Executive Advisor, New Mountain Capital Amy Gleason (<i>pending approval</i>), Acting Administrator, US DOGE Service and Strategic Advisor, CMS/HHS
5:30 – 7:00 PM	Networking Reception
