

THE COOPERATIVE DIFFERENCE

Riceland Carbon Ready[™] began in 2022 with 25 farmer-members piloting 10,000 acres—laying the foundation before the value was proven.

Today, it spans nearly 430,000 acres, with hundreds of farmers and partners engaged.

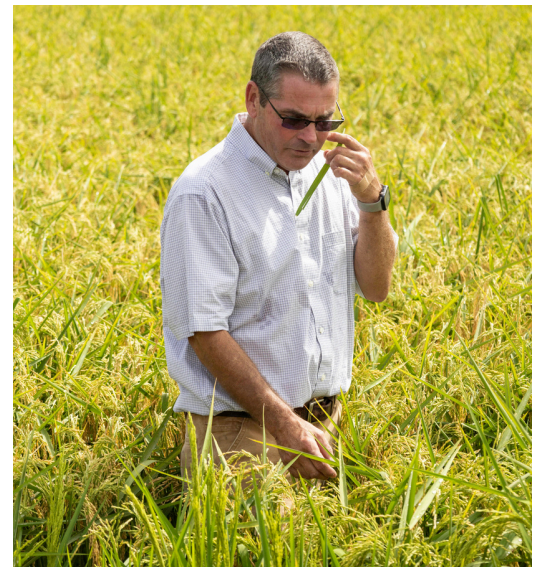

Now in year four, the program continues to evolve—streamlining data, strengthening farmer collaboration, and improving efficiency while maintaining the trust at the heart of our cooperative.

Our focus remains clear: help farmers use resources efficiently, improve profitability, and share the story of sustainable, resilient agriculture.

Since launching in 2022, the program has provided

**OVER \$12 MILLION
IN FARMER PAYMENTS**

(averaging \$20,000 in annual payments per program participant)

PROGRAM HIGHLIGHTS

Riceland Carbon Ready[™] bridges the gap between on-farm practices and Riceland customer goals:

- Drive new market opportunities: helping our customers meet sustainability targets
- Reward sustainable practices: providing payouts to program participants
- Cultivate for the future: tracking key data points through the growing season
