## Requesting PII Erasure

Autohive members have the right to request erasure of their Personally Identifiable Information (PII). This includes your name, email address and avatar that comprise your Autohive profile. Please note that erasing this information will render your Autohive account unusable, and you will be immediately logged out of the platform.

### For General Members

If you wish to request erasure of your PII, you must submit your request to a plan owner of your Autohive plan. The plan owner will evaluate whether the erasure can proceed or if your data must be retained for legal purposes or to ensure continued smooth operation of the plan. If the plan owner approves the erasure, they can submit a formal request to [privacy@autohive.com](mailto:privacy@autohive.com), providing your email address.

### For Plan Owners

If you are a plan owner requesting erasure of your own PII, you may submit a formal request directly to [privacy@autohive.com](mailto:privacy@autohive.com). Before doing so, please ensure the following:

- If other members will continue using the Autohive plan, you must designate at least one other plan owner to maintain plan continuity.
- If the plan is no longer needed, all other members should be removed from the plan to indicate it is being discontinued.

### Multi-Plan Membership Considerations

If you are a member of multiple Autohive plans, erasure can only be processed when formal requests are submitted by a plan owner from each plan you belong to. To avoid this complexity, we recommend creating separate Autohive accounts when participating in multiple organizations.
