

## **SWAROVSKI KRISTALLWELTEN**

Daniel Swarovski, who founded his crystal-cutting company in Wattens, Tyrol, in 1895, had a vision from the very outset – to view crystal not merely as a material, but as an inspiration. With this vision in mind, Swarovski Kristallwelten (Swarovski Crystal Worlds) was opened in 1995 for the one hundredth anniversary of Swarovski as an homage to customers and fans of crystal. Ever since, Swarovski Crystal Worlds has been inspiring moments of wonder. Originally conceived by multimedia artist André Heller and curated by Carla Rumler between 2012 and 2023, many famous artists from the worlds of art and design have interpreted crystal here – each in their own particular way. They created concepts of space and experience from the sparkling material that, after several transformations and expansions, now extends to more than 7.5 hectares. Throughout the year, both indoors and outside, they offer visitors of all ages fascinating impressions that turn a visit into an experience for all senses with specially created fragrances. Swarovski Crystal Worlds has become famous worldwide, not least due to its unique appearance – the head of the Giant that is visible from far and wide. More than 18 million people have visited this magical place, making it one of the most visited attractions in Austria.

### **THE CHAMBERS OF WONDER**

The original principle behind the Chambers of Wonder, which one enters through the head of the Giant and which unfolds underground, is based on the historical chamber of wonder at Ambras Castle in Innsbruck. In the sixteenth century, this chamber was an attempt to assemble a universal collection of all the knowledge of its time. This is what Swarovski Crystal Worlds builds on. The fundamental thought is that each artist and each designer can tell a different story inspired by Swarovski crystal. Famous artists, such as Yayoi Kusama, James Turrell, Lee Bul, Chiharu Shiota, Michael Schmidt, Fernando Romero, Derek McLane and Studio Job have each designed one of the Chambers of Wonder with crystal according to their own inspirations. In every new room, visitors immerse themselves in a completely new world and encounter the artists who created these spaces on a very personal level.

### **THE GARDEN**

In the garden, you find places that radiate beauty, inspiration and energy, painstaking care, esthetics – and legends. An amazing landscape fitting naturally into the surrounding Tyrolean Alpine world has been created here. It inspires the imagination, but at the same time, it also conveys knowledge from both the past and the present. Art installations by well-known creative talents such as Bruno Gironcoli, Thomas Bayrle, Martin Gostner, and Alois Schild, together with brilliantly colorful and varied planting schemes, created by the British garden designer Tony Howard, make the garden a place where visitors love to linger. One of the highlights is the Crystal Cloud by the designer duo CAO PERROT, which consists of more than 800,000 hand-mounted crystals and which – influenced by weather, the time of day,

and the cycles of nature – constantly opens up new perspectives for the visitors. With 8,000 Blue Shade crystals, the artwork Prologue III by Fredrikson Stallard refracts and reflects daylight depending on the position of the sun, energizing its surroundings in the garden of the Giant. Situated south of the Giant, the play tower and the innovative playground landscape, designed by the renowned architectural office Snøhetta, offer children plenty of space for all kinds of playing and climbing adventures. The playful black-and-white form of the Carousel created by the Spanish designer Jaime Hayon presents a fascinating contrast to the luxuriantly colorful garden, drawing children and adults alike into its spell. A place that is particularly special is the Roman Excavation as a “natural Chamber of Wonder.” Remains of walls from Roman buildings from the third century A.D. were discovered during reconstruction work. The discovery included a treasure trove of coins with significant historical value that found its way from below ground after almost two millennia.
