

Emma

The legal due diligence workspace built for M&A.

 **Leader of Tech Law Awards 2026**
M&A and Transaction Innovation

Connect. Analyze. Advise. Before competitors finish their first review.

Emma connects directly to your data room, surfaces material risks across the full data room, and structures the legal findings into a workspace your deal team can act on, from review to closing.

The Reality of M&A Due Diligence

The best deal teams aren't working harder than their competitors. They're seeing more, earlier and structuring findings into client conversations before anyone else has finished a first pass.

That first call, risks prioritized, gaps already identified, is not just competent. It is the moment that makes you indispensable.

The partner whose client hears from them on day one is the partner whose call gets returned first on the next transaction. Emma makes that possible on every deal. Not just the ones where you had the bandwidth.

What Emma Does

Emma is a purpose-built workspace for legal due diligence, providing support throughout the due diligence process.

- **Live Data Room Connectivity**
Direct synchronization with leading VDRs, no manual downloads, no version control issues or lag.
- **Data Room Gap Analysis**
Instantly surface what the seller has not provided against the request list before your team opens the first document.
- **Clause-level Risk Flagging**
Emma identifies and classifies risks across the full data room, aligned to your DD checklist and industry-standard M&A playbooks.
- **One Collaborative Workspace**
Assign, review and discuss flagged risks with your team in one place.
- **Structured Deal Workspace**
Review the data room in an intuitive, well-structured workspace, making document processing effortless and fitting your workflow.

World's Broadest VDR connectivity

Why Emma leads modern dealmaking

Generic platforms are excellent tools for drafting, general productivity, and summarization. However none of them was built for M&A due diligence as a workflow, tailored to support dealmaking from A-Z.

Capacity	Generic	Emma
Live Data Room Synchronization	Manual Upload	Live Connection
Instant VDR Gap Analysis	Not Available	Built-in
Preliminary Report	Manual Setup	Core Workflow
Clause Deviation vs. Market Standard	Custom Prompting	Purpose-built
M&A-structured Due Diligence Output	Ad hoc, Q&A Only	Deal-ready

Generic tools are where you draft and think. Emma is where you run due diligence. They answer different questions and the firms that have both are running a complete M&A workflow.

What Changes, by Role

A technology decision involves multiple stakeholders. Emma speaks to each of them.

Managing Partner

Calls the client the morning after the data room opens. Lead the relationship, do not follow it.

Partner M&A

Full document coverage, not sampling. A structured preliminary report by morning. No trade-offs.

Senior Associate

Emma handles the triage. You apply the judgment, arriving with day-one structured findings.

Junior Associate

Review flagged risks. Apply legal judgment. Not at 1am on document 3,400.

Enterprise-grade Security
