# AX-TWHT Kit:

Heater & Thermostat for AX-TW Enclosure Series

Integrated temperature control accessory for reliable operation in cold environments.

The AX-TWHT kit provides temperature regulation for OPTEX AX-TW Series beam enclosures by combining the heater unit and thermostat into one convenient package. Designed to maintain stable operating conditions in cold climates, the kit includes the AX-TWH24V heater and AX-TWT thermostat, ensuring proper internal enclosure temperature for connected devices. This bundled solution simplifies installation and ordering compared to purchasing the components individually.

AX-TWHT	AX-TW series enclosure heater 12 or 24 VDC & thermostat (sold individually)
AX-TWH24V	AX-TW series enclosure heater 12 or 24 VDC, needed with AX-TWT thermostat (sold individually)
AX-TWT	AX-TW series enclosure thermostat needed with AX-TWH24V heaters (sold individually)
