Health from Hive to Spoon:
Safety of Bee Products within a One Health Framework

Practical Information

Faculty of Veterinary Medicine University of Zagreb & Croatian Veterinary Institute
Zagreb, Croatia

Monday, 20 – Friday, 24 July 2026

Welcome to Zagreb

Zagreb is the capital of the Republic of Croatia, located at the crossroads of Central and Southeast Europe. With almost one million inhabitants, it is the political, economic, cultural, and academic centre of the country.

The city combines Central European elegance with a Mediterranean spirit. Its historic Upper Town (Gornji grad), with medieval streets and buildings, offers a glimpse of the city's origins, while the Lower Town (Donji grad) features 19th-century architecture, parks, and vibrant squares. Zagreb is also well known for its numerous museums, theatres, and galleries.

Transport and Accessibility

Zagreb Franjo Tuđman International Airport (ZAG) is located about 15 km from the city centre. Regular shuttle buses, taxis, and ride-sharing services connect the airport with the city. Public transportation in Zagreb consists mainly of trams and buses, which are convenient for reaching most parts of the city. Taxi services are available throughout the city and can be paid for in cash or by card.

For more information, visit the official Zagreb Airport website:

<https://www.zagreb-airport.hr/en>

Venue

The Meeting will take place at:

Faculty of Veterinary Medicine University of Zagreb

Ul. Vjekoslava Heinzela 55, 10000, Zagreb

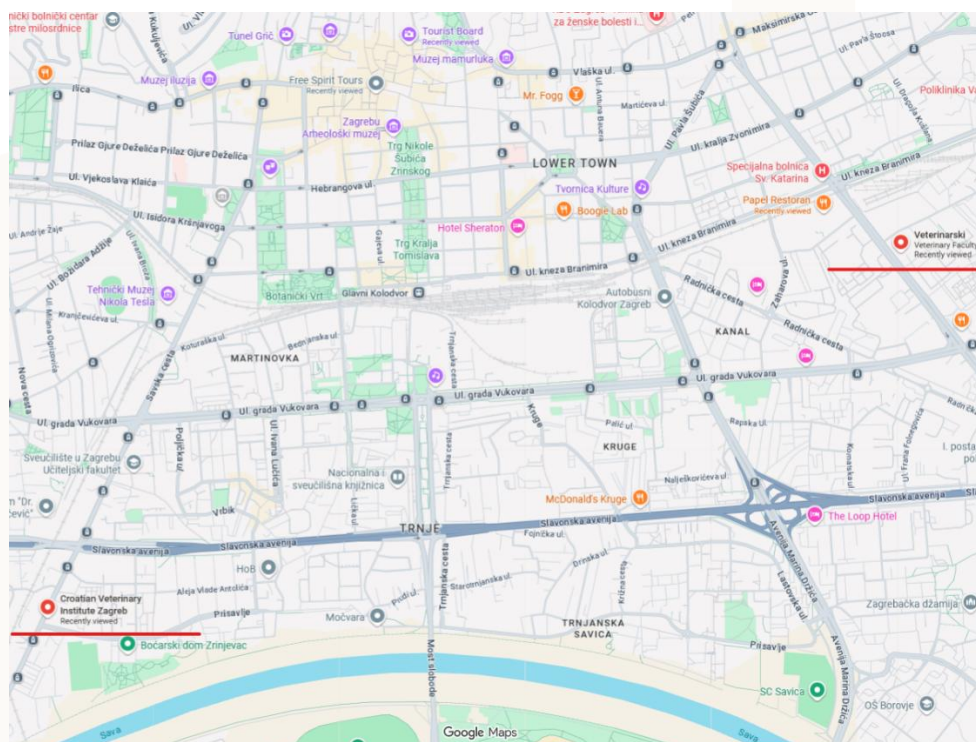

<https://maps.app.goo.gl/SM9fNfPRMgbovAZc7>

Culture and Leisure

The main city square, Ban Jelačić Square, is the starting point for exploring. Notable landmarks include the Zagreb Cathedral, St. Mark's Church, the Croatian National Theatre, and the lively Dolac Market. For leisure, visitors can enjoy Maksimir Park, Bundek and Jarun lakes, or explore the nearby Medvednica mountain.

Zagreb is a safe and welcoming city, with English widely spoken, especially among younger people and in the service sector.

For more information about Zagreb, visit the official tourist information website: <https://www.infozagreb.hr/en/>

Useful Information

Currency: Euro (EUR)

Time zone: Central European Time (CET, UTC+1)

Emergency number: 112

Plug type: C & F (230V, 50Hz)

Croatian country code: +385

Zagreb city code: 01

Faculty of Veterinary Medicine University of Zagreb

Ul. Vjekoslava Heinzela 55, 10000, Zagreb

<https://maps.app.goo.gl/SM9fNfPRMgbovAZc7>

The Faculty of Veterinary Medicine University of Zagreb is a public institution of higher education, which organizes and conducts university study courses, and performs scientific and highly professional work in the realm of biomedicine and health, in the field of veterinary medicine, and other related fields, as well as educational life-long learning programmes for doctors of veterinary medicine. It was founded one hundred years ago, as one of the oldest faculties in the Republic of Croatia, and by its long tradition and established criteria of excellence, is inseparable from the development of the veterinary profession in the territory of Croatia.

Croatian Veterinary Institute

Savska cesta 143, 10000, Zagreb

<https://maps.app.goo.gl/16Wsc82qGupqY1JM6>

The Croatian Veterinary Institute, with a long and rich tradition since 1933, is a scientific and professional-diagnostic-analytical institution that, with its comprehensive activities, makes an immeasurable contribution to the performance of veterinary activities in country. The Croatian Veterinary Institute is responsible for conducting various tests and analyses on animal samples to ensure public health and food safety.

The Law on Veterinary Medicine entrusts the Institute with the tasks of monitoring and studying the epizootiology state of infectious and other animal diseases and perfecting methods for their suppression. The branches of the Institute – the Križevci Veterinary Institute, the Rijeka Veterinary Institute, the Split Veterinary Institute, the Vinkovci Veterinary Institute and the Zagreb Poultry Centre – are also working on the tasks of detecting, monitoring and studying the occurrence and spread of infectious and other diseases, as well as proposing the most favourable methods for their prevention and control.

Through laboratory and field diagnostics, constant monitoring of infectious and invasive diseases from the international list of OIE and determined by the Order on measures to protect animals from infectious and invasive diseases and their financing is carried out.

The Institute pays special attention to the harmonization of laboratory methods with standard methods prescribed by international bodies (OIE, WHO, FAO, AOAC).
