

## <Why Software Vendors Choose Xtract Core>

As an Independent Software Vendor (ISV), you face the challenge of integrating **SAP data into your solution efficiently, reliably, and at scale**. Many providers repeatedly run into technical and organizational limitations: accessing SAP data is complex, often slow, error-prone, and difficult to automate. On top of that, it typically depends on ABAP development or internal expertise – a clear bottleneck that **slows down your innovation and time-to-market**.

**Xtract Core** was designed specifically for these scenarios – as a central component for modern, standardized, and fully automatable SAP data integration. **This white-label solution can be seamlessly embedded into your existing software landscape**, opening up entirely new possibilities for product development, scalability, and customer service.

### Your Benefits at a Glance

#### > Faster Time-to-Value

From initial setup to productive data usage in days, not weeks. This accelerates value creation and reduces customer-side risk.

#### > True End-to-End Integration

From the SAP system directly to the target system – Xtract Core enables continuous data flows without system breaks, manual steps, or complex workarounds.

#### > Scalable & Standardized

Deployable in all customer projects with consistent performance – regardless of SAP module or target system, Xtract Core serves as a strategic enabler for ISVs.

#### > Fully Automated Data Flows

Configure and control extractions via API – fully automatable.

#### > White-Label Integration

Integrate Xtract Core seamlessly into your solution with REST API and flexible interfaces.

*Theobald Software's extraction technology has fundamentally transformed our SAP integration strategy in process mining. It enables us to deliver faster and more reliable insights to our customers while reducing implementation complexity.*
