

## «Xtract Universal – Universal SAP Data Integration»

### Seamlessly, securely, and efficiently transfer SAP data to any target environment

Xtract Universal acts as a central data hub between SAP systems and a wide range of target environments. The solution enables an automated extraction process that meets the highest security standards and minimizes the complexity of SAP interfaces.

#### Key benefits at a glance

##### ➤ **High performance**

Fast and reliable mass data extractions with minimal runtimes directly into your target system.

##### ➤ **Universal connectivity**

Connection to more than 25 different target environments, including cloud storage, databases, and BI & analytics tools.

##### ➤ **Centralized control**

Management of all data flows via a single, intuitive interface.

##### ➤ **Security & governance**

Full control over data access through integration into existing security concepts (Active Directory, SAP authorizations).

##### ➤ **Low resource consumption**

Minimal load on the SAP source system thanks to efficient extraction algorithms.

##### ➤ **Comprehensive SAP source support**

Xtract Universal supports all common SAP components.

##### ➤ **Flexibility for target systems**

Data is provided in a way that is precisely tailored to the respective target architecture.

##### ➤ **Cloud platforms**

Microsoft Azure (Data Lake, SQL), AWS (S3, Redshift), Google Cloud, etc.

##### ➤ **BI & analytics tools**

Power BI, Tableau, Alteryx, Qlik, etc.

##### ➤ **Databases**

SQL Server, Oracle, Snowflake, PostgreSQL, MySQL, etc.

#### Automation and Integration

##### ➤ Flexible integration into existing ETL and scheduling processes via HTTP API or command-line tool.

##### ➤ No programming required in the SAP system (no-code/low-code approach).

## Why Xtract Universal?

The solution closes the gap between the complex SAP world and modern data strategies. Clean Core readiness ensures future-proof and flexible integration that reduces maintenance effort and significantly increases data availability across the organization.

### 15x faster load times

thanks to optimized extraction processes (Symrise AG).

### Significant time savings

Installation and configuration within the shortest possible time.

### Incremental loading

and capturing of changes in near real time thanks to Table CDC.

*With Xtract Universal, we have made enormous progress in table extraction. We were able to reduce the load times of individual tables by a factor of 15 – an impressive result for our data provisioning.*

– Dr. Christian Koch, Head of Data Engineering & Analytics, Symrise AG
