ZENITH

designed by SF&M and Emanuele Bertolini

A meticulously crafted training and guest seating line designed to seamlessly blend functionality, comfort, and space efficiency. Engineered for versatility, Zenith is the ideal solution for meeting rooms, learning environments, auditoriums, corporate spaces, and multipurpose rooms, all spaces where adaptability and efficiency are key. Zenith is more than just a chair—it's an exploration of minimalism, functionality, and human connection. Stripping away excess, the chair embodies a refined, methodical approach to design, where form follows function to create an intuitive seating experience.

Comfort is at the forefront of Zenith's design. The curved seat and backrest naturally conform to the user's body, with a waterfall front edge that promotes circulation. An optional upholstered seat provides additional support, making it an excellent choice for extended use. Offered in three finishes, Zenith effortlessly complements diverse interiors. Available in Black, White, and Light Grey Blue powder coat finishes. Beyond its sleek aesthetic, Zenith is designed with sustainability in mind, featuring easily assembled and separable components that enhance longevity and recyclability.

SF+M Studio (Scagnellato, Ferrarese & Masiero) is a globally recognized industrial design firm with a philosophy rooted in research, experimentation, and innovation. Their designs emphasize strength (*firmitas*), usefulness (*utilitas*), and beauty (*venustas*)—ensuring a balance of durability, function, and aesthetics. Their award-winning work has spanned contract, office, outdoor, and residential furniture, earning prestigious accolades such as the Red Dot Award, Best of Year Honoree, and Good Design Chicago.
