

# Irregular Steppers

**OUTDOOR****POOL SAFE****P4-P5 SLIP RATING**

The Irregular Stepper collection showcases a striking variety of natural stone stepping stones, each uniquely formed and thoughtfully designed to evoke an organic, flowing aesthetic within any landscape. With their asymmetrical shapes and natural textures, these stepping stones introduce a sense of movement and fluidity, offering a more dynamic and less rigid alternative to traditional stepping stones. When paired with our curated selection of complementary stone tiles and pavers, they help craft pathways and garden features that feel both cohesive and visually captivating. Whether used to delineate walkways, define borders, or create focal points, the Irregular Steppers bring an added layer of texture, character, and individuality to any outdoor design, enhancing the overall ambiance with their distinctive, natural charm.
