Somerton Irregular Quartz Limestone is heavily crystallised; we love the way the quartz catches the light and reflects a subtle glow across a room. This creamy quartzite limestone cladding enhances different design elements in its space depending on its grouting and installation method. Whether grouted or dry-stacked, Somerton Irregular Walling adds warmth and subtle elegance to its surroundings.

Stone Colour

Beige, Brown & Grey

Tile Edges

Natural Split

Irregular Walling

20 - 40 mm

Irregular Corners

20 - 40 mm

Ordering Details

Leadtime for product is 18 weeks unless instock

Sealing & Cleaning Tumbled recommends Sealing all Natural Stone Tiles For more information on caring for your natural stone please refer to our website

www.tumbled.com.au

Please note If you are installing your stone without a grout joint we recommend an extra 15-20% for wastage. This then allows the stonemason to cut and shape the stone to ensure the joints are butt-jointed. We also recommend the installer unpacks each crate of stone and use the mix of the sizes supplied. Tumbled will not exchange smaller pieces for larger pieces, it is the installers responsibility to use all the sizes supplied.
