

Rustic Travertine

R A N D O M A S H L A R W A L L I N G

COLOUR

Mixed Travertine

TILE EDGES

Tumbled

APPLICATION

Walling

WALLING

Rustic Travertine

A random ashlar format that brings the character of traditional dry-stone walling to contemporary facades and feature walls. Mixed travertine tones — warm beige, tan and rust — pair with a tumbled edge for an aged, hand-laid look that only softens with time.

WALLING SIZE

Random Ashlar · 20–40mm

Sold in 1m² lots

CORNERS

Random Ashlar · 20–40mm

Sold per lineal metre (1 lm ≈ 0.3m²)

PLEASE NOTE — INSTALLATION

When installing without a grout joint, allow an extra 15–20% for wastage so the stonemason can cut and butt-joint pieces. The installer should unpack each crate and use the full mix of sizes supplied; Tumbled will not exchange smaller pieces for larger.

RECOMMENDED GROUT — WALLING

Walling mix: 5 parts All Stone White Sand · 2 parts White Lime · 1 part Aalborg White Cement · Master Additive. Prebagged grout colours are also available — selected by your designer or stonemason.

Guide only — confirm against a physical sample. Tumbled does not supply grouts.

SEALING & CARE

Tumbled recommends sealing Rustic Travertine with Actichem Defender SV. For ongoing care guidance, visit tumbled.com.au. Defender SV is a premium-grade, solvent-based water repellent designed to protect porous stone and construction materials. It provides deep, long-lasting impregnation to shield surfaces from water ingress, chloride ions, efflorescence, and biological growth while maintaining a natural finish.
