

YOUR WELLBEING PLATFORM

by roboSculptor®

EXPERIENCE THE FUTURE OF VIBROCOMPRESSION BY SPHERES PERFORMED BY ROBOSCULPTOR®

Welcome to **roboSculptor** where cutting-edge technology meets ultimate relaxation.

DESIGNED FOR
LONGEVITY.
POWERED BY AI.

DISCOVER THE FUTURE OF MASSAGE THERAPY

Our state-of-the-art massage robots provide personalised and precise massage therapy, designed to rejuvenate your body and mind.

Each session is tailored to your unique needs, ensuring that every tension and knot is expertly addressed.

Our robots are equipped with advanced sensors and AI algorithms that adapt to your body's feedback in real time.

Whether you're seeking relief from chronic pain, recovery from a strenuous workout, or simply a moment of tranquility, roboSculptor has the perfect solution for you.

At roboSculptor, we believe that everyone deserves a moment of peace, and we're here to make that happen, one robot-assisted massage at a time.

WHY CHOOSE ROBOSculptor TREATMENT?

ADVANTAGES

Designed with user comfort in mind, roboSculptor treatment is integrated seamlessly into any lifestyle, making it ideal for home use or professional settings.

Backed by cutting-edge technology it offers a new solution to personal care and wellness.

The supercharged body treatment with powerful vibrocompression

Gender-neutral

robosculptor

Privacy-oriented

Delivers consistent quality of treatments

Follows tailored protocols precisely

Available 24/7

Easy to use

MAJOR STRENGTHS

PRECISION AND CONSISTENCY

Our advanced AI-powered robots deliver consistent, high-quality massages tailored to your preferences every time.

AUTONOMY AND CUSTOMISATION

roboSculptor allows the patient to choose a customized protocol, remembers the settings and delivers exactly the same quality massage every time the patient comes in for the treatment.

HYGIENE AND SAFETY

Our robots are sanitized after each session, ensuring a clean and hygienic environment. Advanced sensors guarantee a safe and gentle touch

CONVENIENCE AND FLEXIBILITY

Book your session at your convenience. Our robots are available 24/7, perfect for your busy schedule.

TREATMENT OPTIONS

POWER MASSAGE WITH VIBROCOMPRESSION BY SPHERES

Significantly boosting microcirculation, it stimulates the lymph flow, increases the percentage of oxygen in blood, promotes better trophism, cell metabolism and cell renewal. The treatment has direct positive effect on skin color, tissues tone and texture.

PERSONALIZED PROGRAMS

Customize your massage experience with our user-friendly interface. Choose from a variety of massage styles, pressure levels, and target areas.

LYMPHATIC MASSAGE

Relax muscles, reduce tension, and enhance circulation for overall well-being. By incorporating gentle, rhythmic strokes aimed at stimulating the lymphatic system, this therapeutic technique helps to detoxify the body and boost the immune system. The massage encourages the flow of lymph fluid, which carries away toxins and waste products, ultimately contributing to a healthier and more vibrant state of being.

SWEDISH MASSAGE/ RELAX MASSAGE

Gentle and relaxing, it is perfect for stress relief. This treatment features long, flowing strokes, kneading, and circular movements on the superficial layers of muscle. It's an excellent choice for those who are new to massage or prefer a lighter touch. This type of massage can improve circulation, ease muscle tension, and enhance overall well-being, leaving you feeling rejuvenated and at peace. Whether you're looking to unwind after a long week or simply want to pamper yourself, a Swedish massage offers a serene escape from the hustle and bustle of everyday life.

SPORTS MASSAGE

Ideal for athletes, focusing on areas prone to injury and overuse. It incorporates various techniques to enhance performance, prevent injuries, and accelerate recovery time. Sports massage not only helps alleviate muscle tension and pain but also improves flexibility, increases blood circulation, and promotes overall well-being. Whether you're a professional athlete or a weekend warrior, incorporating regular sports massage into your routine can be a game-changer, keeping your body in peak condition and ready to tackle any challenge.

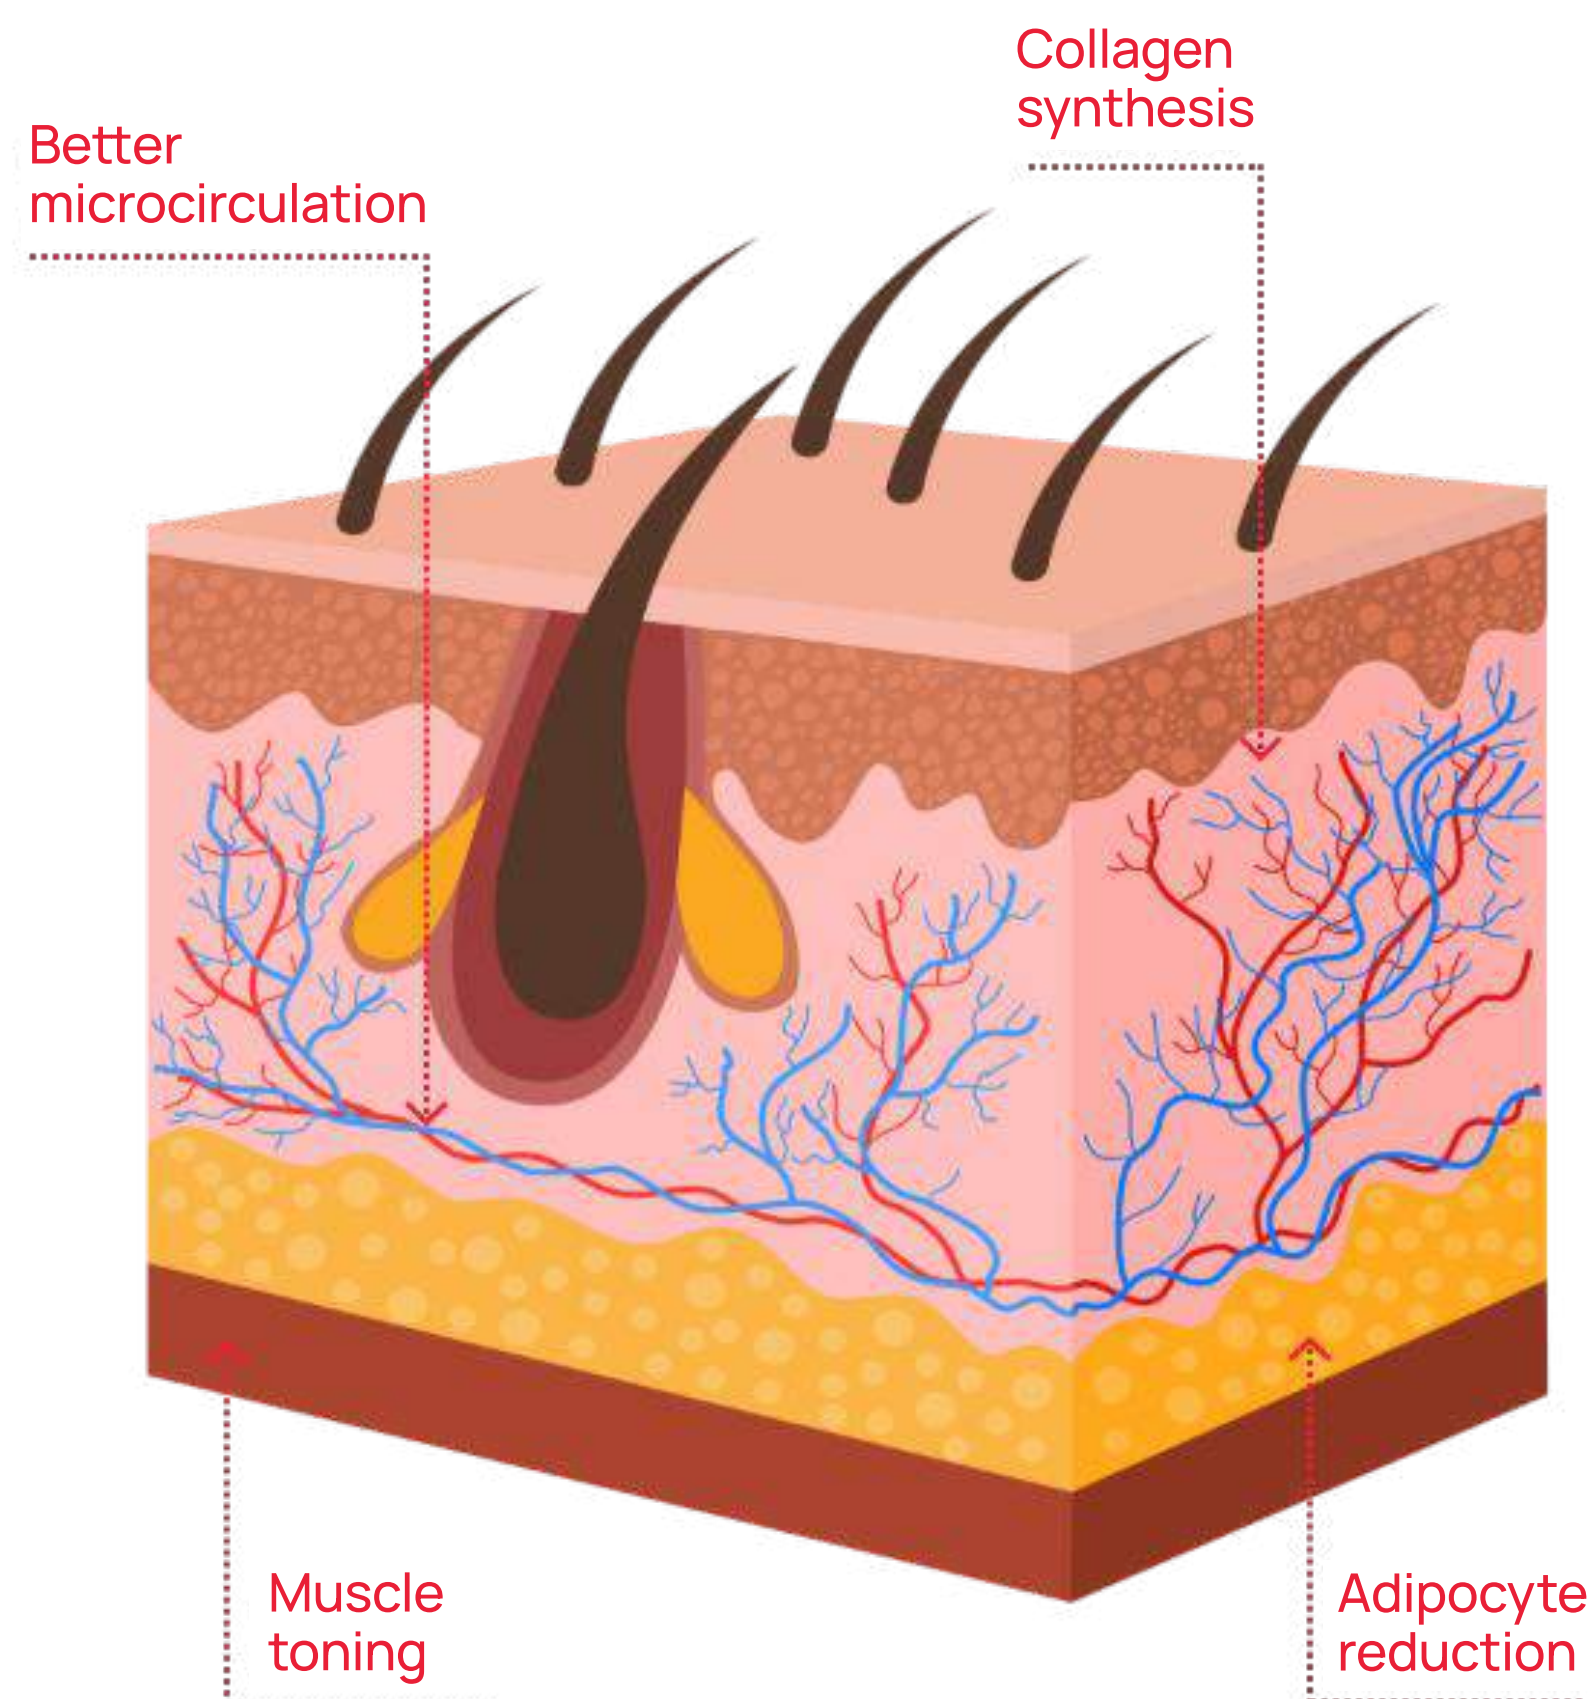

NEUROMUSCULAR MASSAGE

Targeting specific areas to alleviate tension and promote muscle balance

WHAT MAKES VIBROCOMPRESSION BY SPHERES SUCH AN EFFECTIVE MASSAGE TECHNIQUE?

SCIENCE

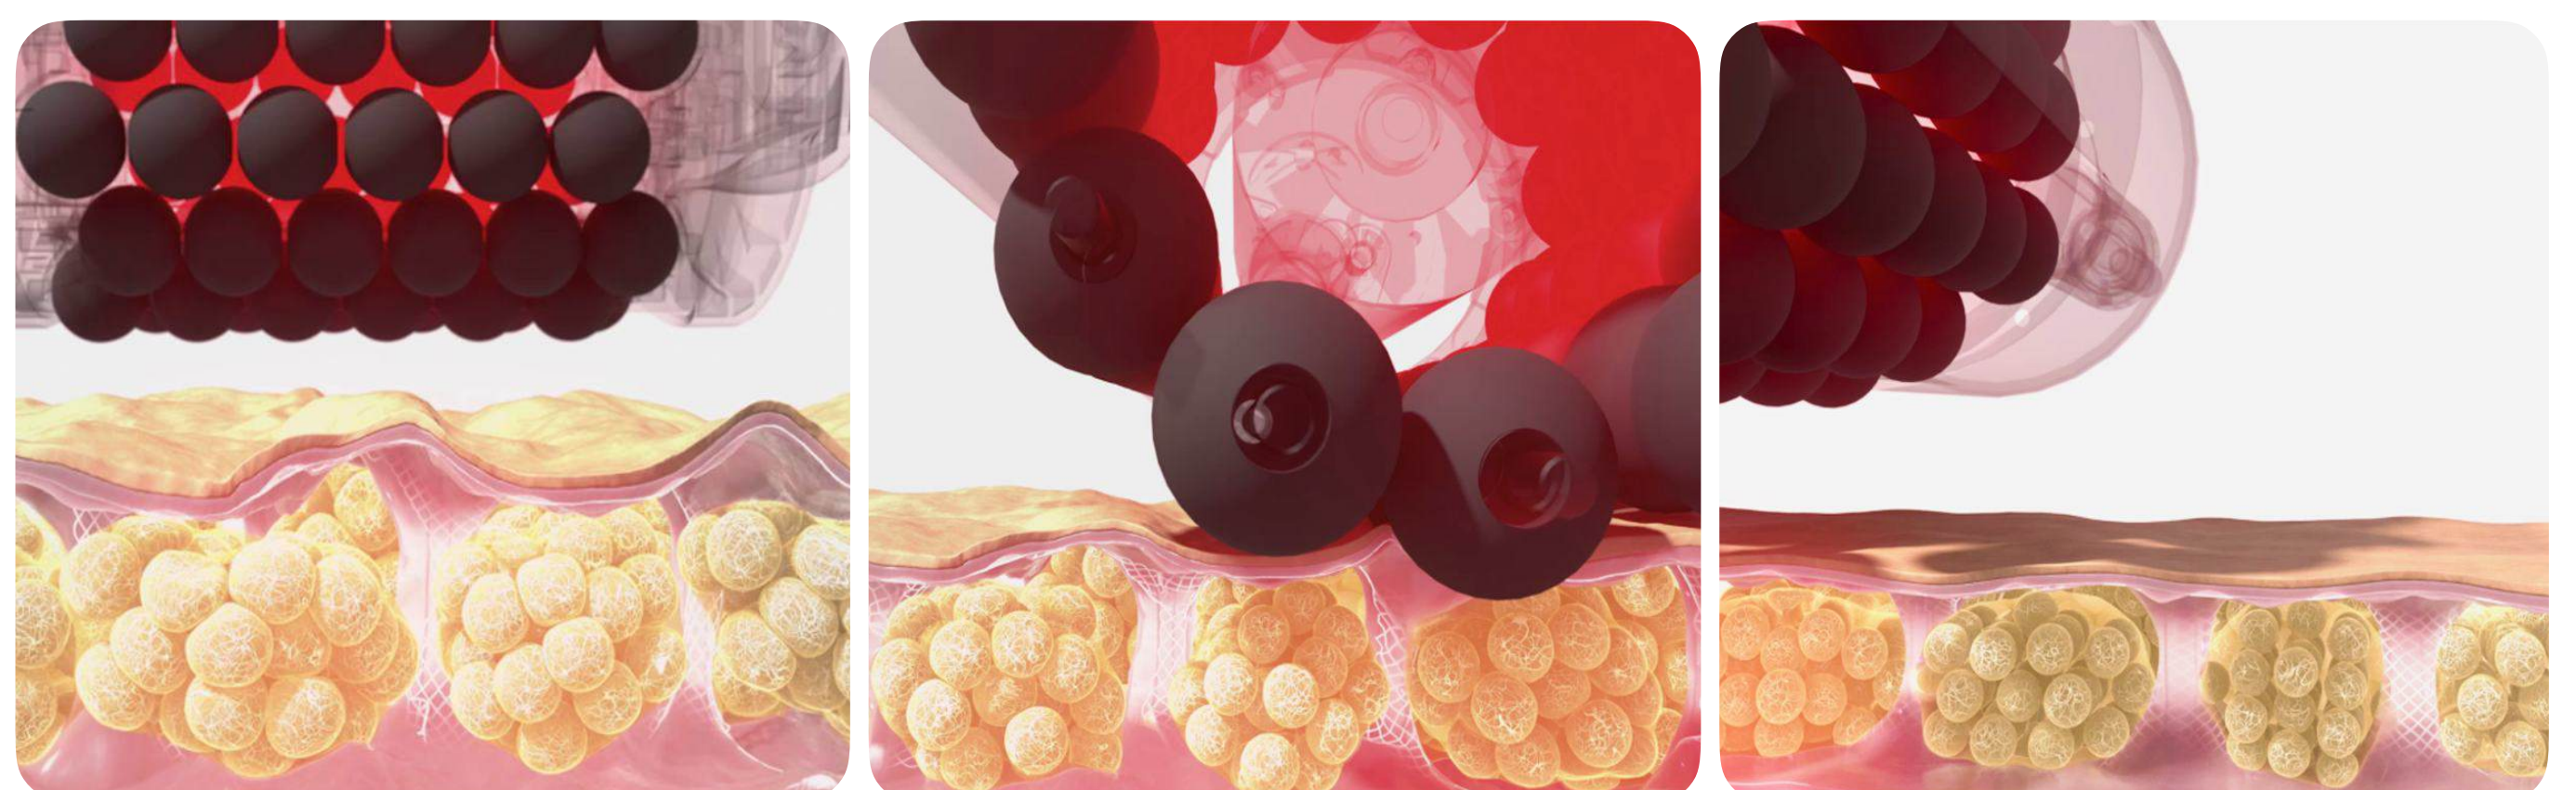

The effectiveness of the treatment is rooted in the physiology.

Human skin has numerous receptors. They react to various external physical impacts such as a touch, pressure, vibration.

The impulses generated by vibration and compression activate the maximum number of mechanoreceptors profoundly improving blood circulation and lymphatic flow.

EFFECT

Immediately after the first session fluid filtration rate is increased, drainage or intercellular spaces is deepened. The toxins are flushed out of the system, the skin becomes visibly smoother.

WHAT MAKES ROBOSCULPTOR STAND OUT IN THE REALM OF BODY TREATMENTS?

TECHNOLOGY

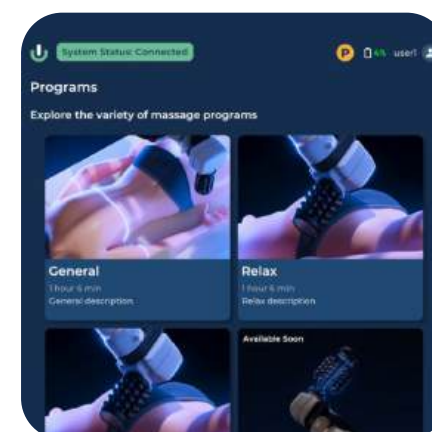

It uses collaborative robot and a complex pneumatic system to apply pressure with special vibrocompression massage tool (100-450 rpm, 120 to 540 Hz).

The system is based on **real-time body detection** in 3-D virtual environment and high-quality imaging (10 fps, precision +-1mm).

White label client app with CRM Integration and scheduling systems.

User-friendly interface and dashboards for **efficiency control**.

ABOUT

HISTORY

RoboSculptor is a German/UAE partnership founded by medical aesthetic professionals Dennis Ledenkoff and Jens Schramm. The idea was born in 2019 with a vision to deliver vibrocompression by spheres treatment autonomously. Previously this special lymph drainage protocol was delivered by experienced specialists only with the Beautylizer aesthetic device.

First prototype was built in 2021 and presented at Dubai Derma 2022. It was a portal version, developed to bear significant loads.

In 2023, based on the feedback from the market, roboSculptor was completely re-vamped and re-invented, featuring sleek and innovative design, added features and new protocols.

FOUNDERS

**Dennis Ledenkof**

Founder, CEO of Production

“Creating roboSculptor took me on quite a journey, across cultures and continents. This passion project, building an autonomous treatment station, transformed my company and my team, tested our dedication and stamina, forced us to become stronger. Not long ago, robotics and aesthetics seemed the opposite sides of the industry spectrum. Now, not without the help from companies like ours, robotic solutions in healthcare, wellness, personal care become more and more acceptable, allowing better access to body treatments: the key to living longer and happier life!”

**Jens Schramm**

CEO of Commercial

“When I was first presented with the idea of roboSculptor, a robotic massage platform, I immediately recognised the pain that this product would solve. I was fresh out of my 5 hour flight to Dubai and my hotel did not have therapists available on a short notice! Since then we came a long way, and I remain a strong believer in effective solutions to simple human problems, that is why I put my years of expertise in the aesthetic market behind roboSculptor.”
