

WE PLIGHT

Wood Eco Project

Since 1977 we design and manufacture steel wood lamps. Our distinctive feature is having hand-painted finishes, wood veneer which allows us to design unique weathered quality products.

The nature man-made product an original heavy/weight lamp is a preponderant trait with its own independent character. There is every piece, where it denotes personality. With strong, proven structure with steady, high quality, functional, resistant and lasting items.

We offer a complete line of pendant, table and floor illumination lamps. All our lamps could be customized to meet with standards for special projects.

Handcrafted Design

The nature and texture of materials and the technology and processes influence the appearance of the product. Specific features of manufacturing and high properties of material sets are the factors which determine the originality of our items manufactured with utmost by unique technology and from natural materials. That's why we're creating products by design.

The best sustainable design regarding materials and processes ever

At Hilti, we never stop thinking about how to improve the way we build our products. We are committed to reducing the impact our products have on the environment by using sustainable materials, reducing waste, saving energy, optimizing our resources and energy, and using biodegradable packaging to produce minimum waste.

Woods / Colors

The appropriate natural materials vary with each location and function, so pay attention to their needs and strengths when manufacturing products. By using natural wood structures and water-based paints, we reach the standard of minimal harm to the environment.
