

Site Visit Equipment Checklist:

What To Bring On a Crash Analysis Studio Site Visit

	Item	Purpose
	High-visibility safety vests	Team visibility to traffic during field observation
	Measuring wheel or tape	On-site dimension checks (lane width, radii, etc.)
	Clipboard or printed field forms	Recording observations by hand
	Printed aerial photograph or base map	Annotating observations in the field
	Camera or mobile device	Photo documentation
	Flashlight	Night or low-light visits
	Light meter	Measuring glare, lighting levels, when available
	Speed measurement equipment	Confirming vehicle speeds, when appropriate
	Cones or temporary warning devices	Team safety while observing in the roadway
	Personal protective equipment (other)	Situation-specific safety needs
	Accessible communication or mobility accommodations	Ensuring all participants can fully take part in the visit

Notes

- ▶ Confirm in advance whether traffic control or police support is required for the visit.
