

PEAKE AUDIO VISUAL SERVICES

PEAKE specializes in delivering secure, scalable, and mission-critical AV solutions tailored for state, local, and federal government command and control environments. Our expertise in AVoIP, real-time data visualization, and video wall technology empowers agencies to enhance situational awareness, streamline decision-making, and ensure operational continuity.

Integrated A/V Solutions for Your Environment

Police & Law Enforcement

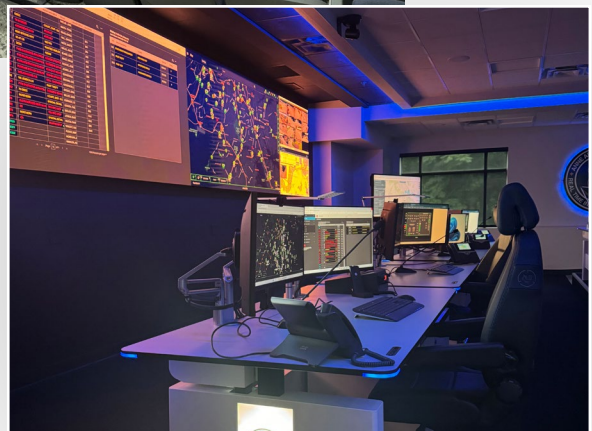

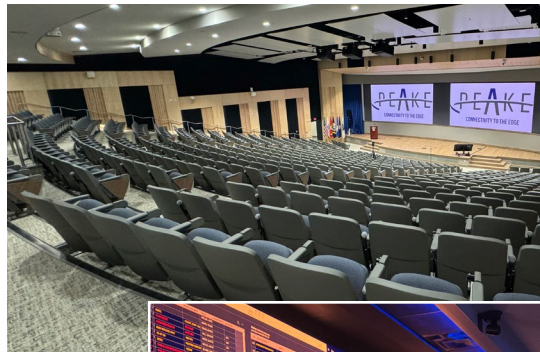

- Real-Time Information Centers (RTICs)
- Command & Control Rooms
- Mobile Command Vehicles
- Interview & Interrogation Rooms
- Public Safety Training
- Drone Go Kits

Emergency Management + Public Safety

- Emergency Operations Centers (EOCs)
- Fusion Centers
- Multi-Agency Coordination
- Incident Command Vehicles and Trailers
- Drone & Thermal Imaging Feeds
- Training Facilities & Simulation Rooms

Department of Defense and Homeland Security

- Fusion Centers & Intelligence Operations
- Emergency Operations & Crisis Management & Joint Operations Centers (JOCs)
- Border & Transportation Security
- Cybersecurity & Network Operations Centers (NOCs/SOCs)

Design, Integrate, Deliver and Support

Video Conferencing & Collaboration

High-definition video conferencing, interactive displays, and unified communications to enhance team productivity.

Digital Signage & Displays

Engaging LED walls, wayfinding systems, and dynamic content solutions to captivate your audience.

Integrated Audio Systems

Crystal-clear sound solutions for auditoriums, stadiums, corporate spaces, and public address systems.

Control & Automation

Intuitive, centralized control for lighting, sound, and displays with smart automation technology.

Event & Broadcast Solutions

High-quality live streaming, recording, and AV production for professional events and broadcasts.

Support

On site and Remote support of video solutions by PEAKE PRO Support

AV PRO Support

PEAKE offers four levels of AV PRO Support to include the following deliverables:

- Manufacturer's Warranty support coordination
- 24/7 Email/Phone NOC Support
- Included Service Labor
- Out of Scope T&M Labor Discount
- Yearly Maintenance & Annual System Report
- Guaranteed Service Scheduling
- Remote Support/PEAKE remote access machine

Why Choose PEAKE?

Optimized for Mission-Critical Operations - We design and integrate high-performance AV systems that support 24/7 operations, enabling agencies to visualize and act on real-time data with precision.

Innovative Technology for AVoIP and Video Wall – deploy cutting-edge AVoIP technology for low-latency, high-resolution data sharing, along with LED video walls and ancillary displays to enhance collaboration. Turnkey Deployment & Lifecycle Support- From design and installation to programming, commissioning, and ongoing maintenance, we provide full lifecycle support to ensure peak performance with minimal downtime.

Proven Government Experience- With a track record of successful deployments in command centers, emergency operations centers, and defense agencies, we understand the unique demands of government AV infrastructure. Connectivity- PEAKE delivers connectivity to the edge, giving your agency the bandwidth it needs to support your audio/visual operations and feeds.

Mobile/Tactical Edge - PEAKE understands that reliable transmission of video, sensor, and ISR data from the edge to the enterprise is necessary for the functional common operating picture.
