

## CONNECTIVITY KITS

PEAKE Connectivity Kits are designed to provide our customers with an on-the-go, SDWAN, mobile network with unparalleled reliability and interoperability. Integrated with world class blending software, our Connectivity Kits combine multiple communication services (FirstNet, Cellular, Satellite-LEO/GEO, Broadband, Wi-Fi) and creates one large network giving you enhanced, reliable and stable communications with greater bandwidth and security, in a portable and rapidly deployable form factor.

### BLEND KIT

- Tactical and Mini
- Built for the Tactical, Portable and Compact Environment
- Connection Point Options:
  - 6 Cellular SIMs + 6 Ethernet
  - 3 Cellular SIMs + 4 Ethernet
  - 2 Cellular SIMs + 1 Ethernet
- Mobile and Rugged design
- Vehicle Fleet Integration for "Internet on the Go"
- Rapidly Deployable- Simple, easy to use format
- Always Connected
- Intuitive Interface
- Powered by Tactical IP BLEND-Blended Connectivity (Cellular, GEO or LEO Satellite, Broadband/Wifi)
- Resilient- connection is not dependent of availability of single cellular or SATCOM service
- Enhanced Security
- Static IP Address for increased control
- Public Safety Broadband Networks Access; FirstNet and Frontline Ready
- Mini- Carry On Size
- SD WAN available

### CUSTOM CONNECTIVITY KITS

- Built for Your Custom Environment - Kitted and Software-Only Solutions
- Private or Public Cloud Hosting in AWS or Azure
- Resilient and Persistent- connection is not dependent of availability of a single cellular service
- Custom- size, function, form factor and more- to your Agency's needs
- Powered by Tactical IP BLEND-Blended Connectivity (Cellular, GEO or LEO Satellite, Broadband/Wifi)
- Always Connected- High Throughput Connectivity
- Mobile design for Vehicles or Tactical Response
- Enhanced Security
- Static IP Address for increased control
- VPN and Type 1 Encryption support
- FirstNet Ready

# LEO CONNECT KITS

Connectivity Kits powered by LEO Connect Satellite Service

## STARLINK KIT (2 CASE SOLUTION)

- Built to provide Connectivity in Remote, Tactical, Rural, Desolate environments
- Powered by Starlink LEO Service by SpaceX
- Blended Connectivity providing resilient and persistent connection via Cellular, Broadband/ Wifi, FirstNet
- Always Connected- High Throughput Connectivity
- Mobile design for Vehicles or Tactical Response available
- Enhanced Security
- VPN and Type 1 Encryption support
- SD-WAN available

### FIRST RESPONSE COMMUNICATIONS

CONNECTIVITY KITS

Blended Bandwidth

Private Cloud

Gateway Cloud Service

aws

Public Internet/VPN

### AGENCY NETWORKS

## TACTICAL STARLINK SYSTEM (1 CASE SOLUTION)

- 1 Case Starlink LEO Solution
- Rapid communications restoration at operations centers, substations, and remote areas
- Easy to Transport
- Simple Setup- no training needed
- Secure, High-Speed Connectivity
- Restore communication in all weather conditions
- LMR gateway
