Nonparametric Statistical Inference, Sixth Edition, continues the tradition established by its predecessors, providing a comprehensive source for learning about nonparametrics. Since its first publication in 1971, this book has been widely regarded as a gold standard in the field. ========== Bradley JV (1968) Distribution-free statistical tests. Prentice-Hall, Englewood CliffsMATH Google Scholar Gibbons JD, Chakraborti S (2010) Nonparametric statistical inference, 5th edn. Taylor & Francis/CRC Press, Boca Raton Google Scholar Kendall MG, Gibbons JD (1990) Rank correlation methods. 5th edn. Edward Arnold, LondonMATH Google Scholar Noether GE (1967) Elements of nonparametric statistics. Wiley, New York Google Scholar Pratt JW, Gibbons JD (1981) Concepts of nonparametric theory. Springer, New YorkMATH Google Scholar Savage IR (1962) Bibliography of nonparametric statistics. Harvard University Press, Cambridge Google Scholar Walsh JE (1962) Handbook of nonparametric statistics, I: Investigation of randomness, moments, percentiles, and distribution. Van Nostrand, New York Google Scholar Walsh JE (1965) Handbook of nonparametric statistics, II: Results for two and several sample problems, symmetry and extremes. Van Nostrand, New YorkMATH Google Scholar Walsh JE (1968) Handbook of nonparametric statistics, III: Analysis of variance. Van Nostrand, New YorkMATH Praise for previous editions: "... a classic with a long history." – Statistical Papers "...the fact that the first edition was published in 1971 is a testament to its enduring success." – ISI Short Book Reviews "...one of the best books available for a theory course on nonparametric statistics. ... very well written and organized ... recommended for teachers and graduate students." – Biometrics "...There is no competitor for this book, its comprehensive development and application of nonparametric methods. Users of one of the earlier editions should certainly consider upgrading to this new edition." – Technometrics "...Useful to students and research workers...a good textbook for a beginning graduate-level course in nonparametric statistics." – Journal of the American Statistical Association
