

LIFT COLLECTION – DDA COLLECTION

COMPATIBILITY STATEMENT

For Architects, Builders, Access Consultants & Certifiers

Purpose of This Statement

This Compatibility Statement outlines the building conditions and site requirements for all products within the **Lift Collection DDA Range**, enabling architects, builders, and access consultants to confidently assess suitability and compliance.

Applies to the following Lift Collection DDA models:

- **LC. STAIR PL+**
- **LC. PLAT 17+**
- **LC. PLAT 2+**
- **LC. PLAT E4+**
- **LC. PLAT E1K+**

All products are engineered to deliver reliable, compliant accessibility in commercial and public buildings throughout NSW and the ACT.

1. Building Types Supported

Commercial & Public Buildings

- Government, council & community facilities
- Schools, universities, childcare facilities
- Healthcare centres, clinics, hospitals
- Retail, shopping centres, commercial offices
- Industrial sites, warehouses, factories

Residential (Common Areas)

- Apartment buildings
- Mixed-use developments
- Retirement villages
- Multi-residential access points

Retrofit & Upgrade Projects

- Existing buildings requiring DDA upgrades
- Heritage or limited-alteration structures (subject to feasibility)

2. Compliance Compatibility

All DDA models meet the relevant accessibility provisions under:

AS 1735.15

Restricted-use low-rise platform lifts for people with impaired mobility.

AS 1735.7

Stairway platform lifts for straight or curved staircases.

When installed per manufacturer documentation, the lifts satisfy NCC accessibility requirements and general DDA obligations.

3. Environmental Compatibility

Indoor Installations

All models are suitable for:

- Offices
- Retail environments
- Public buildings
- Common-area lobbies
- Education and healthcare facilities

Outdoor Installations

The following models are compatible with external environments:

- **LC. PLAT 17+**
- **LC. PLAT 2+**
- **LC. STAIR PL+**

Outdoor configurations include weather-resistant finishes and components appropriate for standard NSW/ACT conditions.

4. Installation Compatibility

Lift Collection DDA lifts are compatible with installation in environments where:

- The area is fully accessible for equipment movement
- Adequate space is available for mounting and safe operation
- Pre-installation works by the builder have been completed
- The installation area is unobstructed and safe for technicians
- Power supply (as per project documentation) is available and functional
- Structural conditions meet safe installation requirements

Feasibility can be confirmed via plan review or site inspection.

5. User Compatibility

The DDA Collection is suitable for:

- Wheelchair users (manual or powered)
- Users with restricted or impaired mobility
- General public access
- Carer-assisted travel
- Low-rise stretcher or equipment transfer (model-dependent)

Platform sizes conform to AS 1735.15/AS 1735.7 minimum accessibility requirements.

6. Registration & Compliance Documentation

At handover, Lift Collection provides:

- A **completed SafeWork NSW certificate** with lift details pre-filled
- Operational manuals and user documentation
- Emergency keys and essential access information

The **building owner** is responsible for submitting the certificate to SafeWork NSW for registration, as registration must legally be completed by the owner or controller of the premises.

7. Limitations & Exclusions

The DDA Collection is *not* compatible with:

- Installations exceeding the maximum travel or capacity limits of each model
- Environments with hazardous or corrosive exposure beyond standard ratings
- Situations where the building conditions cannot support compliant installation
- Sites without clear access for lift component delivery

Feasibility can be assessed prior to order.

8. Statement of Assurance

When installed in accordance with manufacturer documentation, all Lift Collection DDA models:

- ✓ Are compatible with NSW & ACT commercial, public, and common-area environments
 - ✓ Meet AS 1735.7 or AS 1735.15 requirements
 - ✓ Meet NCC and DDA accessibility pathways
 - ✓ Provide safe, compliant, low-rise accessibility
-

Lift Collection — DDA Collection

Commercial Access. Compliant. Reliable.
