

I'm not a robot

Building Construction Illustrated, 5th Edition (2014) is a revered classic that remains as relevant today as it was when first published. This new edition offers the latest information in Francis D.K. Ching's signature style, providing a comprehensive approach to building construction. Ching's decades-long commitment to environmentally-sensitive construction principles is evident throughout the book. The author has expanded on his previous work, focusing on reducing reliance on active environmental control systems and the energy they consume. This edition includes detailed instructions, beautiful graphic presentations, and access to new interactive digital content. The book provides core information about construction materials and methods, which are essential topics in architectural and building technology education. Clear and accurate drawings illustrate state-of-the-art construction processes and materials, including the latest knowledge on sustainability and incorporation of building systems. This edition is a go-to resource for answers to questions about basic construction concepts, making it an essential reference guide for residential and commercial construction, architecture, and structural engineering professionals. With its rich illustrations and in-depth content, Building Construction Illustrated continues to be an indispensable tool for anyone looking to succeed in the industry.

Building Construction Illustrated, Fourth Edition: A Comprehensive Guide to Principles of Building Construction ===== Francis D.K. Ching's renowned book is now available in the fourth edition, featuring the most current information on building construction principles. As a professor emeritus at the University of Washington, Ching has provided an outstanding introduction to building construction for nearly three decades. This revised edition remains as relevant as ever, offering clear explanations and graphic presentations of complex material. Building Construction Illustrated, Sixth Edition is a comprehensive guide that covers the fundamentals of building construction. The book features Frank Ching's signature illustration style and includes new sections on resilient design, diagrids, modular foundation systems, smart façade types and systems, lighting sources and systems, and mass timber materials.
