The Thera-Seat Semi-Zone Kit

Order Code: SZONE-004

The Thera-Seat Semi-Zone Kit is an accessory which can be fitted to any compatible 13cm overlay or 20cm mattress replacement system*

This enables a compatible alternating system to support patients in the seated position with full sacral support and therapy under their tail bone - a high risk zone for pressure areas.

The Thera-Seat system has a number of features which enables this increased support;

- Air pressure is injected directly into the six cells under the patient's sacral region.
- Special restriction valves prevent this extra pressure escaping to the head or foot of the overlay or mattress.
- A specially designed and patented hyper-stretch coverlet stabilizes the cells from above.
- The control unit motor is replaced with a larger unit - increasing the air output from 10 lpm to 18 lpm.
- All air hoses in the sacral region are loaded with special springs to prevent air blockages.

* Not available for Theraflow 3. Thera-Seat (Therapy to 80 degrees) available for Theraflow5 and 8 models.

Unit C3, 15 Narabang Way Belrose, Sydney NSW 2085
