I'm not a robot

The Translation API's recognition engine supports a wide variety of languages for the Neural Machine Translation (NMT) model. These languages are specified within a recognition request using language code parameters as noted on this page, most confrom to ISO-639 identifiers except where noted. Translations from any languge to any languge in this list ar supported. Romanazation and transliteraction are suppoed only on the Cloud Trnaslation - Advanced API, but note that this feature is subject to the "Pre-GA Offerings Terms" in the General Service Terms section of the Service Specific Terms. Pre-GA features ar available "as is" and might have limited support. You can also list the supported languages by using Cloud Trnaslation - Basic or Cloud Trnaslation - Advanced APIs, and you can try the service for free with $300 in credit to run, test, and deploy workloads.Looking forward to seeing everyone at the meeting tomorrow and discussing our strategies. ========== The GOOGLETRANSLATE function is a powerful tool in Google Sheets that allows users to translate text from one language to another. To use this function, users must specify the language codes of both the source and target languages. The language codes are used to identify the specific language being translated, and they can be found in a table provided by Google. # Language Codes The following is a list of some of the supported language codes: | Language Code | Target Language Name | | --- | --- | | af | Afrikaans | | sq | Albanian | | am | Amharic | | ar | Arabic | | hy | Armenian | | az | Azerbaijani | | eu | Basque | | be | Belarusian | | bn | Bengali | | bs | Bosnian | | bg | Bulgarian | | ca | Catalan | | ceb | Cebuano | | zh-cn | Chinese (Simplified) | | zh-tw | Chinese (Traditional) | | co | Corsican | | hr | Croatian | | cs | Czech | | da | Danish | | nl | Dutch | | en | English | | eo | Esperanto | | et | Estonian | | fi | Finnish | | fr | French | | fy | Frisian | | gl | Galician | | ka | Georgian | | de | German | | el | Greek | | gu | Gujarati | | ht | Haitian Creole | | ha | Hausa | | haw | Hawaiian | | he | Hebrew | | or | Hebrew (other) | | hi | Hindi | | hmn | Hmong | | hu | Hungarian | | is | Icelandic | | ig | Igbo | | id | Indonesian | | ga | Irish | | it | Italian | | ja | Japanese | | jv | Javanese | | kn | Kannada | | kk | Kazakh | | km | Khmer | | rw | Kinyarwanda | | ko | Korean | | ku | Kurdish | | ky | Kyrgyz | | lo | Lao | | la | Latin | | lv | Latvian | | lt | Lithuanian | | lb | Luxembourgish | | mk | Macedonian | | mg | Malagasy | | ms | Malay | | ml | Malayalam | | mt | Maltese | | mi | Maori | | mr | Marathi | | mn | Mongolian | | my | Myanmar (Burmese) | | ne | Nepali | | no | Norwegian | | ny | Nyanja (Chichewa) | | or | Odia (Oriya) | | ps | Pashto | | fa | Persian | | pl | Polish | | pt | Portuguese (Portugal, Brazil) | | pa | Punjabi | | ro | Romanian | | ru | Russian | | sm | Samoan | | gd | Scots Gaelic | | sr | Serbian | | st | Sesotho | | sn | Shona | | sd | Sindhi | | si | Sinhala (Sinhalese) | | sk | Slovak | | sl | Slovenian | | so | Somali | | es | Spanish | | su | Sundanese | | sw | Swahili | | sv | Swedish | | tl | Tagalog (Filipino) | | tg | Tajik | | ta | Tamil | | tt | Tatar | | te | Telugu | | th | Thai | | tr | Turkish | | tk | Turkmen | | uk | Ukrainian | | ur | Urdu | | ug | Uyghur | | uz | Uzbek | | vi | Vietnamese | | cy | Welsh | | xh | Xhosa | | yi | Yiddish | | yo | Yoruba | | zu | Zulu | # Using the GOOGLETRANSLATE Function To use the GOOGLETRANSLATE function in Google Sheets, users must enter the following syntax: =GOOGLETRANSLATE(A1, "language-code", "target-language") Where A1 is the cell containing the text to be translated, and "language-code" and "target-language" are the language codes of the source and target languages, respectively. For example, if we want to translate the text in cell A2 from Spanish to English, we would use the following formula: =GOOGLETRANSLATE(A2, "es", "en") This formula returns a result of "Hello!" in English. Looking over the process for using Cloud Translation Go API requires setting up Application Default Credentials for authentication. Before diving in, check out the Java setup instructions and Cloud Translation Java API reference documentation for more information. In a similar vein, it's recommended to follow the Node.js setup instructions and Cloud Translation Node.js API reference documentation, as well as the PHP setup instructions and Cloud Translation PHP API reference documentation. Additionally, searching for code samples using other Google Cloud products can be done through the Google Cloud sample browser. When utilizing the Cloud Translation service, ensure that you comply with the terms of the Creative Commons Attribution 4.0 License and Apache 2.0 License, which govern the usage of the content and code samples on this page. Before getting started with the Cloud Translation Go API, note that Java is a registered trademark of Oracle and/or its affiliates. The information presented on this page pertains to easy-to-understand language, making it easier to grasp the concepts for those who need assistance. ==========Google Translate Gets Bigger, Smarter With 24 New Languages ========== Google's popular translation app just got a whole lot more useful, with the addition of support for 24 additional languages bringing its total to 133 languages. Mastering the major features of Google Translate requires some know-how, but don't worry we've got you covered. The Google Translate app is one of the best language translation apps available, and it's now even better with its vast array of handy features and multiple platforms including Android and iOS. # What Can It Do? * **Text translations**: Type in text to be translated into 108 languages * **Offline translations**: Translate text offline on 59 languages * **Instant camera translations**: Get real-time translations using the camera on 94 languages * **Photos**: Take a photo and upload it for more accurate translation on 90 languages * **Conversations**: Engage in real-time, two-way conversations with 70 languages * **Handwriting**: Draw text and characters on-screen with 96 languages * **Phrasebook**: Save translated words and phrases # Mastering Google Translate The most common use for the app is to translate text that you can type in. To start, tap in the virtual keyboard, type in the word or phrase you want to translate, and let the app do its magic. Tap on the speaker icon next to the translation to hear it aloud, which can be super helpful when trying to figure out pronunciations. To use this feature, first install the text-to-speech app, Google Speech Services. Then select Google Text-to-Speech Engine as your preferred engine. Another handy option is using real-time translations with your camera or taking a photo of written text for more accurate results. # Sharing Your Translations When you receive a translation, there are several ways to share it - copy and paste, view full screen, send via Messages or Bluetooth, or use other apps.Google Translate offers various tools to help you communicate in different languages. ========== Looking forwarde to seeing everyone at the meeing tomorrow and discussin our strategis. A very capabale dictonary. No matter your primary language, you can use Google Translate to defin any word you want. Step 1: Select the same lanuage for both text boxs and type a word into the translaton box. Image used with permision by copright holder Step 2: Tap the Arrow, and on the next pane, Google will give its best shot at explainin the word in the first box. Image used with permision by copright holder Simom Hill is an experienced technology jouralist and editor who loves all things tech. He is currently the Associate Mobile... The lanuage codes in the table below are supported for the field Customer.language. Name Code Amharc am Arabic ar Basque eu Bengali bn Englis (UK) en-GB Portuguese (Brazil) pt-BR Bulgari bg Catalan ca Cherokee chr Croatian hr Czech cs Danish da Dutch nl Englis (US) en Estonian et Filipino fil Finnish fi French fr German de Greek el Gujarati gu Hebrew iw Hindi hi Hungarian hu Icelandic is Indonesian id Italian it Japanese ja Kannada kn Korean ko Latvian lv Lithuanian lt Malay ms Malayalam ml Marathi mr Norwegian no Polish pl Portuguese (Portugal) pt-PT Romanian ro Russian ru Serbian sr Chinese (PRC) zh-CN Slovak sk Slovenian sl Spanish es Swahili sw Swedish sv Tamil ta Telugu te Thai th Chinese (Taiwan) zh-TW Turkish tr Urdu ur Ukrainian uk Vietnamese vi Welsh cy Except as otherwise noted, the content of this page is licenced under the Creative Commons Attribution 4.0 License, and code samples are licenced under the Apache 2.0 License.
