Downloading a video from Facebook allows you to save it locally on your device for easier sharing and viewing. To download a video from Facebook on Windows or Mac computers, iPhone devices, or Android smartphones, follow these steps: On your computer, click the three-dot icon at the top of the video post and select Save Video. This will save the video in the app, but not on your device. Alternatively, right-click the video link and replace "www" with "mbasic," then copy and paste it into a new tab, replacing "www" again. On your iPhone or Android device, use a third-party app like MyMedia to download videos from Facebook. To download a video on Windows or Mac computers, open the video, right-click it, and select Show Video URL. Copy the link, replace "www" with "mbasic," and paste it into a new tab. Select the video player at the top of the page and click Save Video as. Choose a name and destination for the file and click Save. On Android devices, tap the three-dot icon above the video, select Copy Link, and open a browser app to paste the link and replace "www" with "mbasic." Then long-tap the video and select Download Video. Finally, sign in to your account if needed, find the desired video, and tap Save Link as MP4 to save it locally.To download a Facebook video, follow these steps:Sign in to your Facebook account and go to the desired video. Tap and hold on the video, then select "Download video" from the pop-up menu. You may need to grant Chrome access to your photos, media, or files.Once the download is complete, click "Open" to view the video. The downloaded video should appear at the bottom of your screen.Alternatively, you can use the Share feature on Facebook and copy the link. Then, paste it into the MyMedia app (available in the Apple App Store) and select "Download file."To download a Facebook video from your iPhone:1. Find the desired video in the Facebook app.2. Tap the Share button and select the chain-link icon.3. The app will prompt you to say "Copied." Open the MyMedia File Manager app, type "fbdown.net" into the search bar, paste the video URL, and tap "Download."4. Select your desired quality (SD or HD) and choose a file name before downloading.Once the download is complete, the progress bar should disappear. You can then find your video in the Photos app by tapping on it and selecting "Save to Camera Roll."Here are the ways to download Facebook videos on your desktop browser or mobile phone. We'll explore two methods: using a third-party service and a hack that tricks Facebook into giving you a download option. The first method involves visiting fdwn.net (or alternative sites) and pasting the link in the box, then choosing the desired quality. The second method is a bit more complicated, requiring you to replace "www." with "mbasic" in the URL bar, which will open the video in a new tab where you can right-click and save it. If you're on an Android phone, downloading Facebook videos is even easier - simply copy the link, paste it into your browser, and long-press the video to select download. For desktop users, this method will also work, but be aware that you'll be limited to a lower-resolution video.Given article text here sadly downloading videos from facebook isn't possible on their website or app however using snapsave you can download regular videos reels and live streams which is handy because live streams are often only available for a short time after they air giving you more time to watch at your leisure to start the process find a video you want to download log into your account bookmarking it lets you easily find it again click save video on the upper right corner of a post select the collection to add it to if you have bookmarked videos click saved shortcut or go to saved videos in your account copy the video URL either from the individual post or list of saved videos visit snapsave.app download is incredibly simple no need for an account software or prep just paste the url and downloadTo save Facebook videos for later viewing, you can follow these steps.Firstly, go to the video you want to download, then tap the Share button. Copy the URL of the video by tapping 'Copy Link' at the bottom of the Share menu.Next, switch to Reel downloading mode on SnapSave and paste the copied URL into your web browser's address bar using a mobile web browser like Chrome or Safari.Alternatively, you can use FDOWN.net, which works in a similar way to SnapSave. Installing its browser extension may also be beneficial if you plan to download many videos in the future.Additionally, note that Facebook only allows downloads of public videos, and those from private accounts cannot be downloaded.1 Go to YouTube in the address bar with "mbasic" and press Enter. This changes the URL to the mobile basic version of the web page.2 Play the video in full screen by simply tapping the video.3 Download the video by tapping and holding the video while it's playing and then tapping "Download video."4 Download a YouTube video using 4K Video Downloader on your desktop computer. Go to download the app for your operating system, and follow the prompts to complete the installation.5 Download a Facebook video by logging in, opening the video you want to download, clicking the "Share" menu, and pasting the link into 4K Video Downloader on your Android device.To download a Facebook video, follow these steps:1. Open Facebook and navigate to the video you want to download.2. Click or tap the Share menu, then click or tap Copy Link to copy the link to the video.3. Navigate to a third-party video downloader website, such as FDown.net or Toolzu.com.4. Paste the video URL into the bar provided by the website.5. Click Download next to the desired video quality, then select Download.6. Wait for the download process to complete.Alternatively, you can also save videos directly from Facebook.1. Open Facebook and navigate to the video you want to save.2. Click or tap in the upper-right corner of the video.3. Select Save Video or Save Reel.4. Choose a collection to save the video to, such as "Watch Later" or "Post Later".5. Select a privacy setting, then create a new collection if desired.6. Find your saved videos in the designated folder on your device.Viewing and Downloading Saved Videos on FacebookTo view your saved videos on Facebook, ensure you're online and signed in. Follow these steps:- Open the Facebook app and tap your profile icon (Android) or menu icon ().- Tap "Saved" to navigate to your video collections.- On a computer, click "Saved" in the menu bar to the left, then select the collection containing your videos.You can also see recent saved videos under "Most Recent". To play a saved video, tap on it.
