

White Paper: The Book of Clubs (\$CLUBS)

www.bookofclubs.com

Introduction

The Book of Clubs (\$CLUBS) is the official meme coin of Storybook and the foundation of our mysterious, multi-layered entertainment universe. It is more than just a token—it's a narrative, a movement, and the driving force behind our secret movie production company.

The Book of Clubs project is a two-part initiative:

1. **Write and publish "The Book of Clubs" novel**, a thrilling conspiracy narrative that gives life and meaning to the \$CLUBS token.
2. **Launch CLUBS Productions**, a stealthy media entity dedicated to adapting the novel and other connected works—like *The Grey Theory* and *Trapped on the Other Side*—into major motion pictures and streaming content in collaboration with studios like Universal Pictures and Netflix.

Vision

Our vision is to build a decentralized entertainment powerhouse where storytelling meets blockchain, enabling our community to be part of a growing narrative ecosystem. \$CLUBS token holders will gain exclusive access to early content, project clues, and real-world rewards through literary and cinematic engagement.

Tokenomics

The \$CLUBS token will be launched on the **Solana blockchain**, utilizing its speed, cost-efficiency, and scalability. Key tokenomics include:

- **Total Supply:** 1,000,000,000 \$CLUBS
- **Max Supply:** 1,000,000,000 \$CLUBS
- **Token Distribution:**
 - Liquidity Pool: 82% (100% burned after launch)
 - Team: 8% (buy back, 6-month lock, 12-month monthly vesting)
 - Marketing & Production: 8% (buy back, allocated for promotional campaigns and content development)
 - Investors: 2% (buy back)

Team Token Lock, Buy Back & Vesting Schedule

- **6-Month Lock Period:** No team tokens unlocked.
- **Months 7–18:** 8.33% unlocked per month.
- **18 Percent buy back:** Team, Market, and Investors allocations retained after launch.

This structure emphasizes commitment, discourages dumping, and builds long-term trust.

Governance

Token holders will play a vital role in shaping CLUBS Productions. Through on-chain proposals, votes, and social campaigns, \$CLUBS holders will have the ability to influence which stories move forward, how giveaways are executed, and what secret riddles or mysteries are released.
