PATIENT HIGHLIGHT

BRENDA'S TESTIMONIAL:

"I can't thank him enough for what he's done for me, what he's given me. What he's given me is my confidence back."

BRENDA'S STORY

Brenda came to us with a set of upper teeth and lower teeth that were just awful. She couldn't wear them. She was in pain and had bone recession to the point where every time she would bite, she had pain in her lower jaw. She had her dentures for probably thirty years. She had gone to maybe 5, 6, or 7 offices that said the same thing. "There is no hope."

We restored Brenda's hope, probably in less than an hour. We gave her 4 dental implants. We secured her teeth. And it was the first time in fifty years, she was able to chew the food she wanted.

NEW OFFICE TECHNOLOGY- MEET YOMI

Our new office technology is called the YOMI- it is a robot-assisted surgery device used to place dental implants. Robotic-Assisted Devices becoming a standard of care across surgical disciplines, offering unprecedented improvements in Procedure Planning, Augmented Anatomical Visualization, and Haptic Guided Surgery.

Dr. Bruce was the first dentist in Michigan to have incorporated this technology into his practice. Immediately, Dr. Bruce saw how this technology would shorten the surgical time and offer easier implant placement for his patients.

DR. ALLAN OLEINICK D.D.S.

**LEARN MORE ABOUT
DR. OLEINICK**

Dr. Allan Oleinick is a graduate of the University of Michigan '79 (BS) and Case Western Reserve University School of Dentistry '83 (DDS). He also performed a 1 year General Practice Residency at Sinai Hospital of Detroit, Michigan.

He practiced for 6 years in Boca Raton, Florida before returning to Metro-Detroit where he has been practicing for 30 years.

He loves practicing at Smoler Smiles to continue his work helping people live healthy. Dr. Oleinick believes Doctor to patient communication is essential to allow patients to make educated decisions regarding their dental treatment and to achieve the most favorable oral health outcomes.
