SYSPRO TRACEABILITY
FOR FOOD & BEVERAGE MANUFACTURERS

More than Traceable. Actionable.

Facing a recall?
Trace. Isolate.
Eliminate. Mitigate.

1

Product recalls are on the rise year on year due to:

Undeclared Allergens & Toxins

Pathogens

Cross-Contamination & Physical Contamination

Malicious Tampering

Increasing Regulations

Complex Global Supply Chains

Product Fraud & Mislabeling

2

Navigating the complexity of a recall becomes simple when you're able to act quickly.

3

ACTION

SYSPRO ERP goes beyond just providing data – it enables you to take actionable steps to mitigate risk before and during a recall.

4

SYSPRO ERP offers a fully integrated traceability system which enables manufacturers to...

Trace. Isolate. Eliminate. Mitigate.

- ☑ Track ingredients from receipt right through to production and delivery.
- ☑ Rapidly identify, quarantine and retrieve potentially unsafe foodstuffs.
- ☑ Accelerate the time to completion of your product recalls.
- ☑ Improve governance and drive compliance.
- ☑ Test and improve your traceability system.
- ☑ Remain compliant and meet regulatory requirements.
- ☑ Mitigate the risks associated with recall.

5

Consider the cost of not having an effective traceability system:

E. coli Warning
Lettuce Recall in US

Needles Found in Fruits
Fruit recall in Australasia

Several Brands of Pet Food Recalled
Menu Foods Pet Food

World's Worst Outbreak Leading to 216 Deaths
Enterprise Foods - The South African Listeriosis Outbreak

6
