

# Instant Payouts. Real Customer Loyalty.

Payouts Network is the real-time B2C payout platform powering instant compensation, rewards, vouchers, and incentives for the world's leading airlines, banks, and consumer brands. One platform. Origination to settlement. Branded as yours.

Used by the world's most demanding consumer brands.

## Grow revenue. Build loyalty. Replace the back office.

### Increase Revenue

Instant rewards move customers to spend right away — not days later, not after a check clears.

### Improve CX

Real-time digital payouts turn frustrating moments into positive ones. The experience reflects your brand, not the back office.

### Increase loyalty

Customers who get rewarded in the moment come back. Delayed payouts erode loyalty.

### Reduce fraud & costs

Digital delivery and controlled workflows replace manual processes, cut misuse, and reduce overhead.

### Replace outdated payout systems

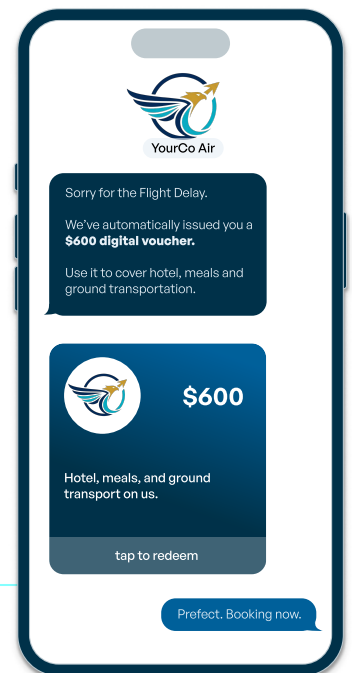

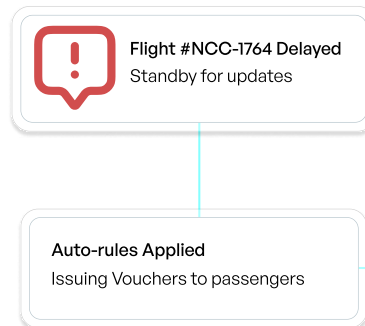

Paper vouchers, mailed checks, and delayed reimbursements have no place in a real-time consumer relationship. Payouts Network replaces all of it — without rip-and-replace.

## Built for the moments that define every consumer brand.

### When a flight goes wrong.

Airlines use Payouts Network to deliver real-time digital vouchers the moment a disruption happens — meals, hotels, ground transportation, baggage compensation. No paper vouchers. No long lines. Passengers receive what they need by text, instantly.

Used by six of the major U.S. airlines.

## When a customer earns a reward.

Loyalty programs run better when redemption is instant. Payouts Network delivers rewards digitally the moment they're earned — through text, branded digital cards, vouchers, and direct point-to-payout conversion across 37M+ merchants in 200 countries.

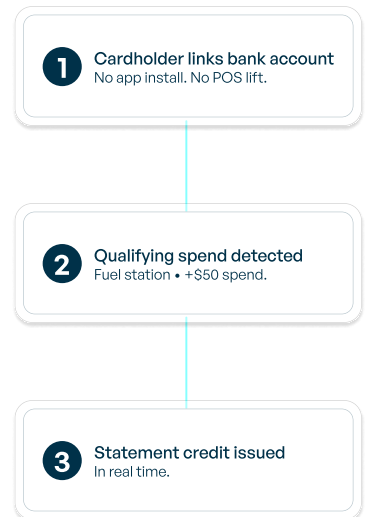

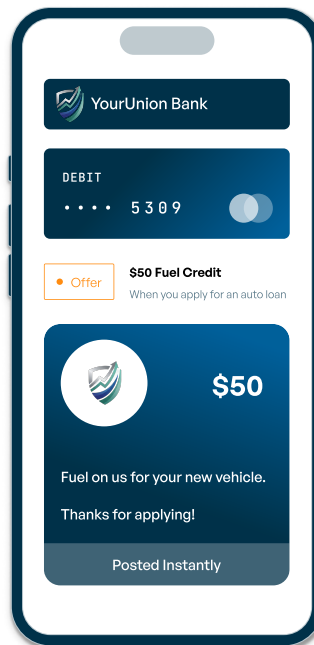

**Used by leading hospitality, sports, and consumer brands.**

## When a financial institution wants to drive a behavior.

Card issuers use Payouts Network to power cardholder engagement programs that actually move the needle — grocery rewards, fuel incentives, restaurant offers, account activation bonuses. Programs that drive interchange, retention, and engagement without operational overhead.

**Used by Fortune 100 payment processors and Top-25 U.S. banks.**

## Proven in industries that can't afford to wait.
