

Manage the Full Compliance Cycle - from Monitoring Regulations to Demonstrating Compliance

How does Regology successfully meet diverse compliance needs? It uses next-generation artificial intelligence (AI) to address what matters most immediately. Designed to automate, anticipate, and act, our AI-powered platform simplifies the management of evolving regulatory content and streamlines the setup of new policies and controls, keeping your compliance programs dynamic and adaptive.

Automate Regulatory Tracking

Make spreadsheet updates a thing of the past.

✓ Self-updating Law Library

Our Smart Law Library is not only tailored to your business requirements and alert needs but also auto-updated with the latest amendments in laws and regulations.

✓ Automatic Change Tracking

Forget about comparing documents side by side. Regology redlines the latest amendments so that you always know what regulatory changes took place.

✓ Generative AI Assistant

Leverage Reggi, our generative AI assistant, for concise summaries of bills, laws, and regulations to enhance your understanding and accelerate response times.

✓ Seamless GRC Integration

We integrate with your Governance, Risk, and Compliance (GRC) provider via certified, secure API connections to automatically sync all updates.

Anticipate Changes & Their Impact

Know what new laws and regulations are on the horizon.

Horizon Scanning

Stay ahead of the curve with automated tracking of bill progression related to the laws and regulations in your Smart Law Library.

Proactive Legal Research

Use Reggi to conduct a Q&A about new bills and regulations, research multiple jurisdictions at a time, and draft corresponding policies and controls.

Impact Assessments

Understand how upcoming regulatory changes impact your organization's risks and controls and prioritize them accordingly.

Act with Precision

Streamline processes and prioritize what is most important.

Draft & Create

Leverage the power of generative AI with Reggi to instantly create drafts of your requirements, policies, and controls, saving a copious amount of time.

Map & Assign

Connect upcoming regulatory changes directly to your existing compliance framework, integrating requirements, controls, policies, and risks.

Collaborate

Assign regulatory tasks to specific teams and users, ensuring responsibilities are clear and accountability is maintained.

Report

Deliver timely compliance reports to stakeholders, keeping everyone informed and engaged, and ensuring compliance across all levels of your organization.

Monitor

Regularly review and update the compliance status to maintain oversight and ensure adherence to all regulatory standards.
