HCP/PI - If you made any code changes with the radio buttons above, provide a rationale in the text box below:

HCP/PI - Order/Instructions:

(Please provide instructions to the staff about how the treatment should proceed (e.g., continue medication, discontinue medication, decrease dosage, etc.).)

HCP/PI - Is this an SAE?

- No
 Yes
(An SAE is any adverse event, without regard to causality, that is life-threatening or that results in any of the following outcomes: death; in-patient hospitalization or prolongation of existing hospitalization; persistent or significant disability or incapacity; or a congenital anomaly or birth defect. Any other medical that, in the medical judgment of the Principal Investigator/Study Physician, may jeopardize the subject or may require medical or surgical intervention to prevent one of the outcomes listed above is also considered a SAE. A planned medical or surgical procedure is not, in itself, an SAE, even if hospitalization is necessary.)

HCP/PI - Response re: ppt continuation in study

- Participant may continue in the trial
 Participant may NOT continue in the trial
 Participant opts to withdraw from study

HCP/PI - Response re: medication

- Study medication should be continued
- Study medication should NOT be continued
- Dose adjustments recommended _____
