Legion is the Trusted Path to Secure Agent Orchestration

The Secure Agent Platform Trusted by the DoD

From Data to Action: Intelligence You Can Trust

Legion connects your systems, enforces compliance, and delivers outcomes at mission scale.

Infrastructure

Run anywhere (Cloud, On-Prem, Air-Gapped, Edge)

AI Models

Choose, host, and serve any model

Connections & Integrations

Connect to your systems and data

Tools

Give AI Access to the apps your teams use

Permissions

Role-based access & governance

Observability & Governance

Deep oversight with audit logs & controls

Memory & Storage

Store context for AI & agent continuity

Workflow Builder

Design and deploy secure, automated workflows

Agent Orchestration

Deploy, manage, and govern agents across secure systems

Embedded Assistants

Bring cross-system AI directly into the systems your teams use every day

---

Intelligence Summaries *90% Faster*

Generate and validate structured reports across classified + unclassified systems.

Source: Internal Legion Case Study

Automated Procurement Reviews

Validate POs and expenses against policy in real time for instant Approve, Decline, or Flag decisions. All results are compliant and audit ready.

Operational Readiness *10x Faster*

Streamline mission planning and documentation to accelerate force readiness and response.
