

Legion for Maintenance, Repair, and Overhaul

# Prevent Stockouts. Recover Warranty Claims. Reduce Downtime.

Your technicians waste hours digging through systems while equipment sits broken, overtime costs spike, and customers wait.

Legion connects to maintenance and ERP systems like Maximo and SAP to automate workflows draining your budget. Auto-schedule jobs to cut overtime. Surface vendor catalogs and inventory so techs find parts in seconds. Pull exact fixes from past work orders.

Deploys securely in your environment—trusted by defense, aerospace, and manufacturing. If there's a manual process costing you money, we'll automate it.

## BEFORE

- Overtime costs spike, techs can't find parts or procedures
- Fewer jobs per technician from searching systems
- Mean time to repair drags, nobody knows what fix worked
- Customers wait while teams hunt across platforms

## AFTER

- Cut overtime with auto-scheduling based on location and availability
- Increase jobs per technician by eliminating manual searches
- Reduce MTTR by surfacing exact procedures from past fixes
- Improve customer experience with faster resolution

## Snapshot

- ⚡ Real ROI in Your First Pilot**  
Launch with 2 production workflows in under 8 weeks that deliver measurable results
- 🕒 Cut Technician Task Time in Half**  
Eliminate hunting for manuals, calling warehouses, and return trips from missing parts
- 🛡️ Proven in High-Security Environments**  
Built for and trusted by organizations with stringent compliance requirements, including the U.S. Department of War
- “ Legion has become a game-changing tool. It integrates seamlessly into our workflows, saves significant time, and makes our teams faster and more efficient.”**  
– U.S. Special Operations Command

## Built for High-Security Operations

Deployed in defense, aerospace, and heavy industry with SOC 2, ITAR, and government-grade security. Your data is never used to train AI models.

## Workflows That Reduce Downtime and Recover Costs

Automatically flag warranty opportunities, predict stockouts early, and generate full parts kits—cutting downtime, preventing return trips, and recovering missed costs.

## Impact in Your First Pilot

Launch fast with 2 production workflows in under 8 weeks, then scale to more use cases as your needs grow. Most pilots focus on warranty recovery and stockout prevention for immediate ROI.

## How it Works

[ 01 ]

### Legion Connects to Your Core Systems

Integrates with Maximo, SAP, Oracle, SharePoint, Google Drive, and 100+ maintenance and inventory systems.

[ 02 ]

### In Your Systems, On Their Devices

Legion AI lives inside your CMMS and on technician tablets/phones, no extra app needed.

[ 03 ]

### Ask & Act in Plain Language

Find manuals, check inventory, file warranty claims, or create requests across systems, just type or tap a workflow.

[ 04 ]

### Clear, Tracked Actions

Every action runs in your connected systems with full visibility into who did what and when.
