

Legion For Current Operations

# Accelerate Decisions. Synchronize Operations. Maintain Tempo.

Legion embeds secure AI directly into MSS, CPCE, and your command and control systems, giving CUOPS teams instant access to reports, CCIRs, and operational data—so 2-hour briefing prep doesn't consume your entire shift.

Built for battle captains and TOC operations, Legion unifies data from your C2, intelligence, fires, and sustainment systems in one secure, role-aware AI assistant. Automatically triage CCIRs, generate commander updates, and accelerate decision cycles while honoring your existing permissions and classification requirements.

**BEFORE**

- Dig through chat logs, emails, slides to confirm decisions
- 2-4 hours daily preparing commander updates
- Manual CCIR checks slow critical updates
- Reports flood in—staff scramble to log and triage

**AFTER**

- Reports auto-triaged against CCIRs and SOPs
- CUB preparation time reduced by 90%
- Automated briefings with pre-filled data
- Real-time correlation across C2 systems

**Snapshot**

**⚡ Mission-Proven Results in Real Operations**

Deployed across U.S. Special Operations Command, supporting 70,000+ users in live operations.

**🕒 Decision Cycles in Minutes, Not Hours**

Automate CCIR triage, report consolidation, and battle drill execution for your CUOPS team

**🛡️ Proven in High-Security Environments**

Built for and trusted by organizations with stringent compliance requirements, including the U.S. Department of War

**“ Legion has become a game-changing tool. It integrates seamlessly into our workflows, saves significant time, and makes our teams faster and more efficient.”**

– U.S. Special Operations Command

**Seamless, Secure Connections**

Connect C2, intelligence, fires, and sustainment systems in one view without manually cross-checking reports across platforms.

**Operations at Full Tempo**

Auto-sort reports, surface CCIRs, and draft briefings, so your operations team focuses on synchronizing operations, not chasing data.

**Mission-Ready in Your First Pilot**

Deploy fast with proven CCIR, CUB, and battle drill workflows, then scale as needs grow.

**How it Works**

[ 01 ]

**Connects to Mission Systems**

Integrates with MSS, CPCE, AIDP, JBC-P, DCGS-A, email, chat, and dozens of other C2 systems.

[ 02 ]

**In Your TOC and at the Edge**

Legion AI runs inside existing mission command systems—from TOC workstations to tactical edge devices.

[ 03 ]

**Ask & Act in Plain Language**

Triage CCIRs, consolidate reports, draft FRAGOs, and coordinate battle drills—just type or choose a workflow.

[ 04 ]

**Clear, Tracked Actions**

Actions execute across systems with full visibility and chain of custody for classified operations.

**See Legion in Action**

Book a demo and see how Legion accelerates decision cycles in your TOC.
