[LEGION PACKS] RESEARCH DISCOVERY AND ANALYSIS PACK

LEGION INTELLIGENCE

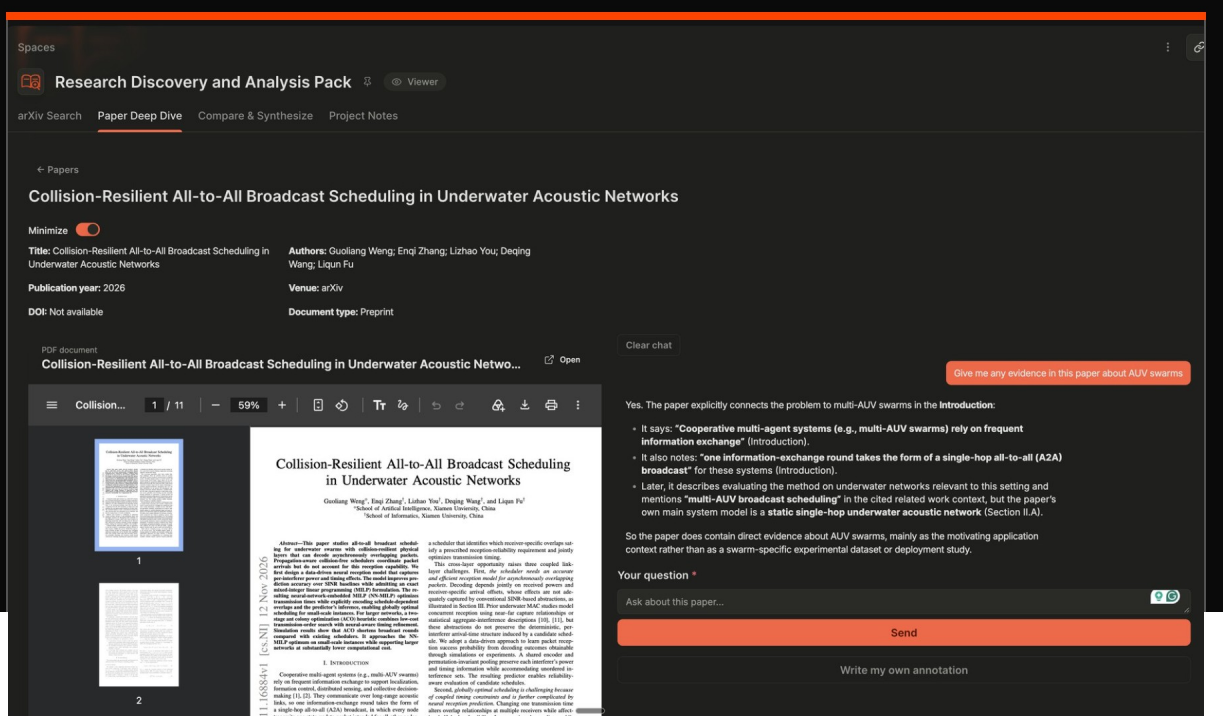

Papers Found. Evidence Cited. You Judge the Science.

Legion Intelligence runs in your environment, inside the access controls you already have, and gives your scientists one place to find, read, annotate and compare papers.

80%
less follow-on research, including time previously spent validating outputs

6 hours
saved per research activity

AT A U.S. DEPARTMENT OF ENERGY NATIONAL LABORATORY

FOR YOUR SECURITY REVIEW

Who Can See the Research, and Where Does It Go?

Every search, answer and synthesis respects collection access. Sensitive and export-controlled research stays inside your environment, and models never train on your data. Project records are shared across your organization, so reviewers can follow the work.

01 **Security review** 02 **Deploy on-prem** 03 **First question**

FOR YOUR SCIENTISTS

Can a Reviewer Check Every Point Against Its Source?

Answers come from the paper being asked about. Annotations keep the quotation and location behind them. Comparisons across papers are cited and checked against the original evidence, so a peer reviewer can retrace the reasoning.

01 **Ask the paper** 02 **Annotate** 03 **Compare**

RESEARCHERS DECIDE

Legion finds, suggests and compares. Nothing is saved until a researcher checks it against the cited sources and saves it.

IN THE PACK

arXiv Search Finds and saves papers

Paper Deep Dive Answers and annotations

Compare & Synthesize Cited analysis

Project Notes Goals, notes and drafts

CONNECTED TODAY

- ✓ **arXiv, through arXiv Search**
- ✓ **Documents your scientists upload**
- ✓ **Papers grouped in a Legion Collection**

Tell us which sources your teams rely on next.

Start With One Long Report

We'll walk your security and research leads through the Pack on an approved report of your choosing.
