

Identity Governance & Automation

Control access across your enterprise—securely, automatically, and continuously.

Why Access Becomes a Risk

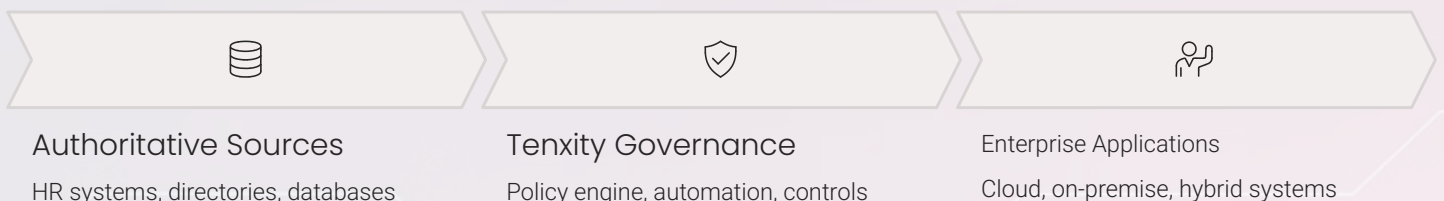

- Disconnected identity sources
- Manual access delays
- Excess access & role conflicts
- Audit stress and visibility gaps

Tenxity Approach

- Authoritative identity foundation
- Policy-driven automation
- Continuous governance
- Business-aligned access

Govern access continuously—without red tape.

High-Level Architecture

Centralized governance | Automated decisions | Continuous control

Core Features

Key Capabilities

Joiner-Mover-Leaver

Automate provisioning throughout the employee lifecycle

Role Base Access Control (RBAC)

Define and manage roles with precision and clarity

Risk Scoring

Quantify and prioritize access risks in real-time

Automated Provisioning

Deploy access changes instantly across systems

Access Requests & Approvals

Streamline access requests with policy-based workflows

Conflict Roles Management (SoD)

Prevent toxic access combinations automatically

Access Reviews

Certify access rights with efficient review campaigns

Audit Reporting

Generate compliance reports on demand

What This Means for Your Business

Seamless Access On Day-1

Onboard faster with automated provisioning

Instant Access Termination

Access is removed immediately at exit. No orphaned accounts.

Contractor & Vendor access

Provision and revoke third-party access automatically and on time.

Always audit-ready

Compliance evidence is continuously available—no last-minute effort.

Reduced manual IT workload

Automation frees IT for strategic work

Early detection of risky access

Proactive risk identification and remediation

 **Right access. Right time. No chaos.**

Technical Capabilities

Built for Enterprise Reality

Cloud-Native Scalability

Flexible Deployment

Comprehensive Integrations

Prebuilt Connectors

Intuitive Configuration

API-Driven Extensibility

Ways to Get Started

SaaS (Cloud)

Subscription-based, fully managed service

Get started quickly & Achieve value faster

On-Premise

Deployed within your environment

Meet regulatory or data requirements

Hybrid

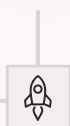

Combine cloud and on-premise at your own pace

Optimize resources with flexible deployment

Adoption Model

Start Small

Pilot with key systems, prove value fast

Mature Governance

Continuously optimize to sustain security & compliance.

Expand Coverage

Scale across the enterprise, broaden impact

Why Tenxity

1

Dedicated Identity Governance

A purpose-built, comprehensive platform, not just an add-on module.

2

Business-Centric Design

Empowering non-technical users with intuitive and accessible interfaces.

3

Accelerated Time-to-Value

Achieve rapid deployment and immediate, measurable impact.

4

Integrated Compliance & Audit

Compliance is embedded into every workflow, ensuring audit-readiness from day one.

About Tenxity

Tenxity delivers advanced cybersecurity software, specializing in identity governance and automation. We empower enterprises to confidently manage access, significantly reduce risk, and effortlessly maintain regulatory compliance.
