

C&I Hybrid Cabinet

Z BOX-C PLUS 261 Hybrid

The Z BOX-C PLUS 261 Hybrid is an integrated liquid-cooled PV-plus energy storage cabinet that combines lithium battery modules, a fire suppression system (FSS), and an embedded EMS into a single compact unit. Its integrated design simplifies system architecture and installation, while the modular structure allows flexible capacity expansion as project requirements grow. When used with a hybrid inverter and intelligent energy management, the cabinet supports multiple operating modes, enabling efficient coordination between PV generation, energy storage, and load demand.

Higher Space Utilization

1.4m² Footprint, larger capacity per cabinet, saving space and site cost.

Versatile

Support multiple brands of hybrid inverter, with higher selectivity.

Safe & Reliable

IP55, optimized ventilation design, temperature difference within 3°C.

High PV Utilization Capability

Supports up to 250 kW PV input with wide MPPT voltage range for flexible PV system design.

Expandable & Modular

Easy modular design supports parallel connection for convenient system expansion.

Simplified System

Sufficient power for most C&I applications, reducing parallel inverters.
