

TAKE THE GUESSWORK OUT OF CYBERSECURITY PLANNING

Most technology leaders face the same cybersecurity planning challenges: too many risks, not enough resources, and a constant struggle to align every IT and security team member around what matters most.

Cyber Heat Map helps you build a living roadmap by providing expert guidance, planning tools, and a peer community.

Cyber Heat Map isn't just a tool. It's a complete system that simplifies cybersecurity planning.

We bring together structured assessments, expert coaching, and a trusted peer network to help resource-constrained teams build clarity, show progress, and focus on what matters. With Cyber Heat Map, you'll:

- Complete a collaborative, founder-led assessment in hours, not weeks
- Prioritize improvements based on risk, resource impact, and compliance value
- Align teams and stakeholders with simple roadmaps, live coaching, and peer discussions
- Use the planning platform that evolves with you — no spreadsheets or outside consultants required

Join 140+ cybersecurity leaders who use Cyber Heat Map to replace guesswork with actionable insights.
