

TRIMLESS MINI CEILING CONNECTION

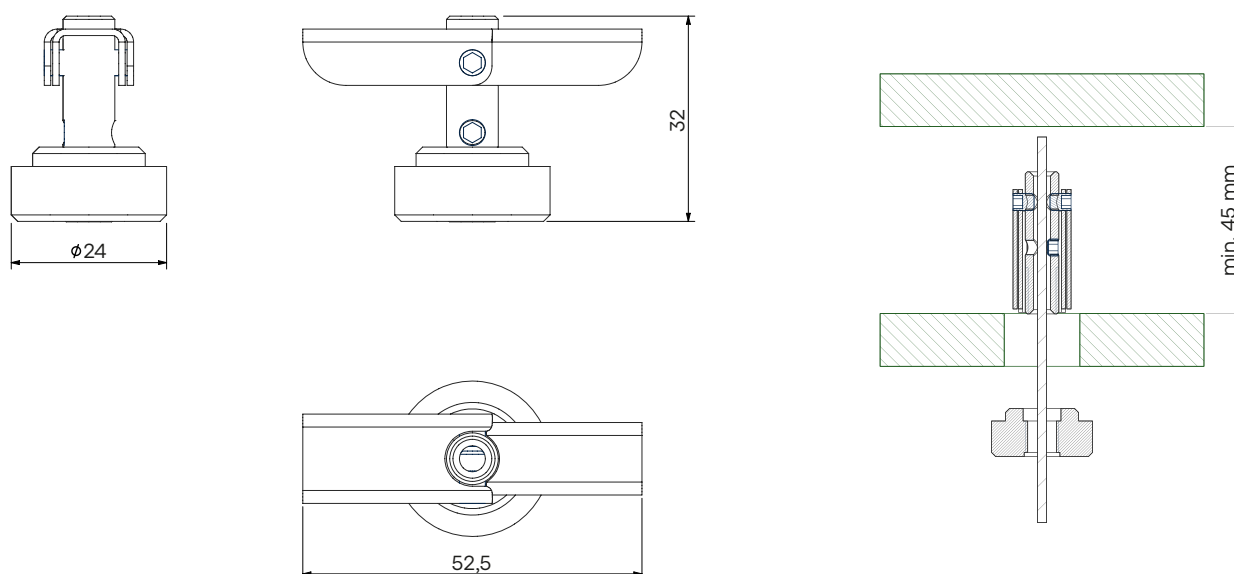

BROKIS®

TRIMLESS MINI, a minimalist ceiling anchor solution, simplifies installation of lights in suspended drywall ceilings. It offers new possibilities for installing BROKIS lights without the use of a traditional ceiling canopy, thereby providing yet another level of variability in the creation of bespoke lighting compositions.

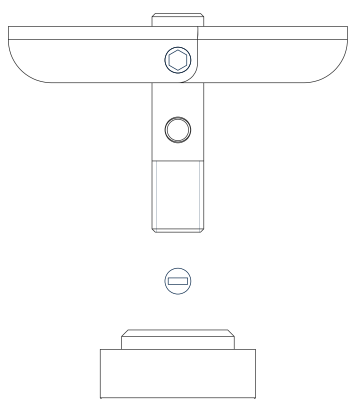

Intended for use with 12.5 mm drywall.

The total load capacity depends on the type of drywall and the grid from which it is suspended. The load capacity of the component itself exceeds the carrying capacity of the power cable and drywall alone.

Cable version – coaxial – opening 18 – 19 mm

Parts breakdown

Materials

- stainless steel body + retention tabs
- dural nut

Finishes and colours

The nut is finished in a textured black (RAL 9005) or textured white (RAL 9003) powder coat.

All materials and finishes are corrosion resistant.
