PROBLEM STATEMENTS

Innovate. Solve. Transform Healthcare.

01

SMART HOSPITAL MANAGEMENT USING GENERATIVE AI

Design an AI-powered hospital management platform that automates appointments, patient communication, medical documentation, and operational workflows.

02

AI-BASED CANCER DETECTION ASSISTANT

Develop an AI solution that analyzes medical images and patient data to assist doctors in early cancer detection and diagnosis.

03

RURAL TELEMEDICINE ECOSYSTEM

Build a digital healthcare platform connecting rural communities with doctors through virtual consultations, digital prescriptions, and remote monitoring.

04

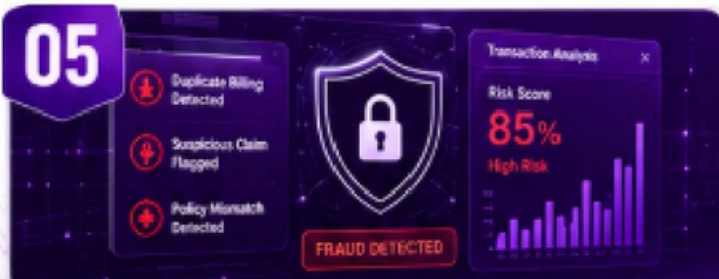

SMART WEARABLE HEALTH MONITORING SYSTEM

Create a wearable healthcare solution that continuously monitors vital signs and provides real-time health alerts.

05

HEALTHCARE FRAUD DETECTION USING MACHINE LEARNING

Design a machine learning system that identifies fraudulent insurance claims, duplicate billing, and suspicious healthcare transactions.

PITCH TO DOCTOR

Validate your healthcare solution with:

- ✓ Doctors
- ✓ Hospital Administrators
- ✓ Clinical Experts
- ✓ Healthcare Professionals

PITCH TO VC

Present your startup idea to:

- ✓ Venture Capital Firms
- ✓ Angel Investors
- ✓ Healthcare Investors
- ✓ Hospital Owners
- ✓ Family Offices

 Explore funding and growth opportunities

50+ CURATED STARTUPS

Network and collaborate with:

- ✓ HealthTech Startups
- ✓ Med Tech Innovators
- ✓ Diagnostics Companies
- ✓ Digital Health Platforms
