Sewing Automotive

Your partner
for automotive
upholstery
& versatile
manufacturing.

Prevent Sewing Automotive combines two key production sites within Prevent Industrials, located in Goruša (Visoko) and Žepče. Together, these locations form a unified production entity specializing in automotive upholstery sewing, with over 20 years of industry

experience. Our dedication to quality and innovation ensures that we meet the ever-evolving demands of the market, adapting to the specific needs of our customers, both locally and internationally.

Core Activities and Specializations

Our expertise lies in automotive upholstery sewing, delivering high-quality, precision-stitched solutions tailored to the industry's demanding standards.

Expanding beyond automotive applications, we also specialize in non-automotive product expansion, applying our craftsmanship to a variety of sectors.

Our comprehensive production services cover every stage of the manufacturing process, from prototyping and material selection to large-scale production and quality control.

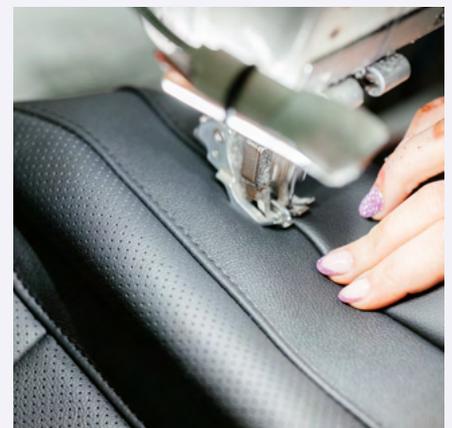

Driven by technology and innovation, we integrate advanced machinery, automation, and sustainable practices to ensure efficiency, durability, and cutting-edge design in every product we create.

Upholstery Sewing

Automotive

Both the Goruša and Žepče facilities are specialized in automotive upholstery sewing, producing high-quality seat covers and interior components for vehicles. These facilities have been designed to meet the precise demands of automotive manufacturers, ensuring that every product produced is durable, aesthetically pleasing, and fits the exact specifications of our customers.

With years of expertise in automotive textiles, we work closely with our clients to offer tailored solutions that meet their unique requirements, all while adhering to the highest industry standards.

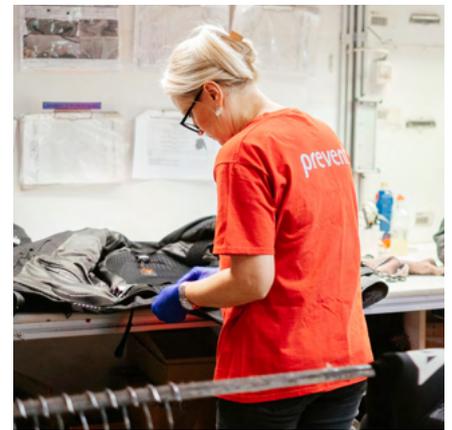

Product Expansion

Non-Automotive

In response to evolving market needs, both locations have expanded their operations to include non-automotive sewing services.

Notably, the facilities now produce motorbike jackets and pants for Dainese, a renowned brand in the sportswear and motorcycling industry. This diversification allows us to serve a broader range of customers and maintain a flexible approach to changing market demands.

Production Services

Comprehensive

Beyond sewing, we offer a full spectrum of services that cover the entire production process. This includes pattern making, fabric and leather cutting, and assembly - all tailored to meet the specific requirements of our customers. Our team collaborates closely with clients to ensure that every product meets the highest quality standards and is delivered in a timely manner.

We also focus on innovation and continuous improvement in production processes, ensuring that we remain at the forefront of the industry.

Technology and Innovation

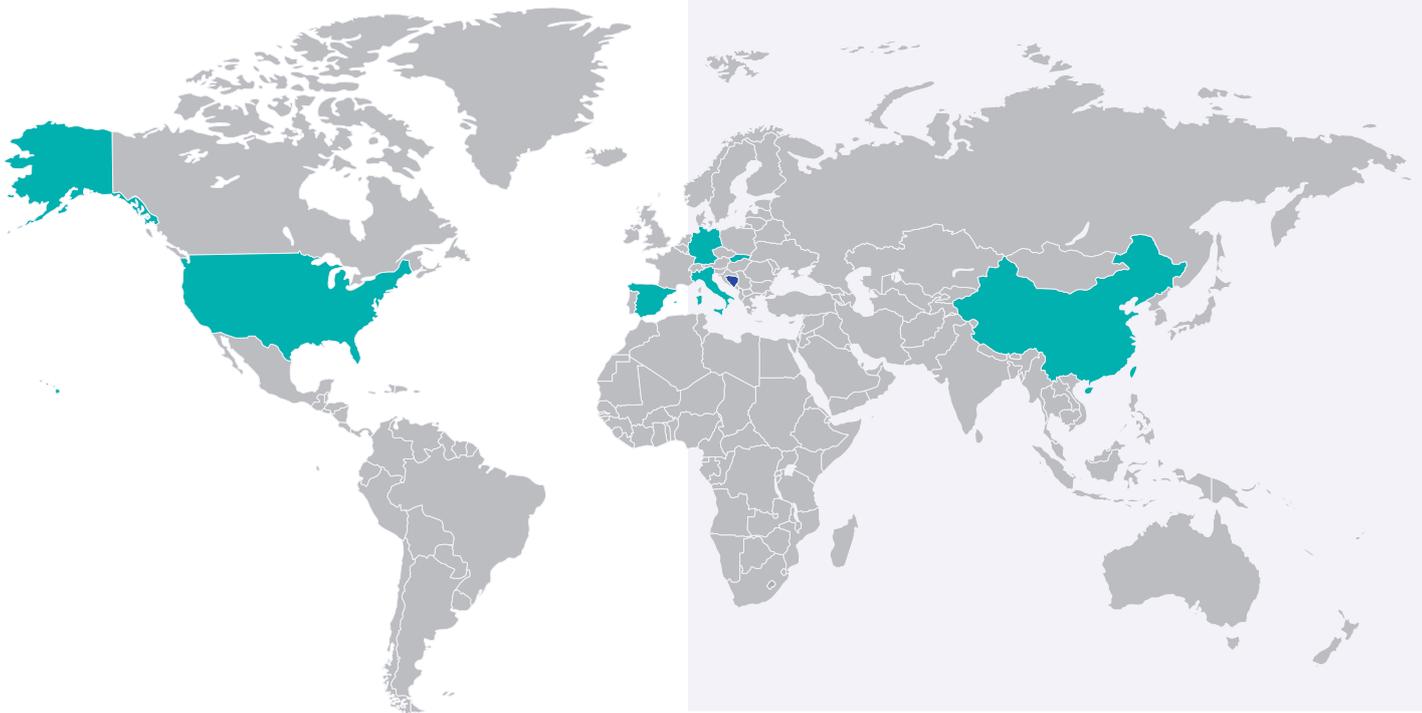

Both facilities are equipped with state-of-the-art technology to ensure efficiency, precision, and flexibility in every stage of the production process.

From advanced sewing machines to automated cutting systems, we incorporate cutting-edge technology to deliver products that exceed customer expectations. Continuous investment in technology is a key part of our strategy, helping us stay ahead of industry trends and provide top-quality products to our clients.

Global Presence

Our reputation for quality, reliability, and innovation has earned us the trust of leading clients.

Prevent Stamping's products are exported to diverse markets, including Spain, Germany, Italy, Czech Republic, USA, and China. This global reach underscores our

ability to meet rigorous international standards and positions us as a reliable partner for businesses worldwide.

Vision

Mission

Our vision is to be the leading provider of high-quality automotive upholstery, recognized globally for our ability to deliver consistent, innovative, and tailor-made solutions that exceed the expectations of our customers.

We aim to build long-term relationships with clients and partners by maintaining our commitment to excellence, continuous improvement, and adaptability in a fast-changing industry.

Mission

The mission of Prevent Sewing Automotive is to provide exceptional sewing services for automotive upholstery and other textile and leather products, combining expertise, innovation, and dedication to meet the needs of a global market. We strive to deliver top-quality products while constantly enhancing our processes and expanding our capabilities. Through our work, we aim to contribute to the success of our clients and partners, offering them solutions that meet both the highest standards and their specific requirements.

Our Core Values

Quality:

Quality is the foundation of our business. Every product, whether automotive or non-automotive, is produced to meet the highest industry standards. We pride ourselves on delivering flawless products that stand the test of time.

Precision:

Attention to detail is paramount in our operations. From pattern making to final assembly, we ensure

that every step of the production process is executed with the utmost precision, resulting in products that meet or exceed customer specifications.

Innovation:

We are committed to innovation, continually improving our processes, adopting new technologies, and expanding our service offerings to stay ahead of industry trends and customer needs.

Teamwork:

Teamwork is key to our success. We foster a collaborative environment where our skilled workforce works together to achieve shared goals, ensuring the smooth execution of every project.

Customer Focus:

Our customers are at the heart of everything we do. We build long-term relationships by providing tailored solutions, exceptional service, and products that deliver value and meet our clients' specific needs.

Goruša Facility

8,100
sqm

The Goruša production site has earned its reputation over the years by working with renowned OEM customers and producing high-quality automotive upholstery. This facility specializes in handling a variety of materials, including textiles, leather, and artificial leather (vinyl), making it a key player in the automotive sector. In addition to automotive seat

covers, Goruša excels in hand-cut leather production and specialized upholstery assembly, allowing it to meet the diverse needs of its clients.

Spanning over 6,300 m², with an additional 1,800 m² allocated for future expansion, Goruša's manufacturing facility is one of the largest and most advanced in the region.

Production Capacity

55,000,000

production minutes

With a current annual production capacity of 55 million production minutes, it is fully equipped to handle both large-scale orders and intricate, custom requests.

Skilled Workforce

We ensure a steady pipeline of talent and expertise to drive our growth and innovation for years to come.

530

employees

The facility is staffed by 530 skilled professionals, and we are continually growing, with plans to further increase our workforce as demand rises.

Our Portfolio

The Ford logo, featuring the word "Ford" in its signature script font.The Hyundai logo, featuring a stylized blue "H" inside a circle, followed by the word "HYUNDAI" in a bold, blue, sans-serif font.The Fiat logo, consisting of the word "FIAT" in a bold, black, sans-serif font.The Dainese logo, featuring a red stylized "D" emblem, followed by the word "DAINESE" in a bold, black, sans-serif font.The Hofbrucker logo, consisting of the word "HOFBRUCKER" in a bold, black, sans-serif font, with "SEIT 1948" in a smaller font below it, flanked by horizontal lines.

Some of the world's most prominent brands, including Ford, Renault, Dainese, Hofbrucker, Fiat, and Hyundai, rely on us for their upholstery needs. Beyond automotive, we also specialize in the production of Dainese motorcycle jackets and pants, demonstrating our ability to diversify and deliver high-performance products for a variety of industries.

Žepče Facility

6,693
sqm

Located in the heart of Bosnia and Herzegovina, the Žepče facility covers a total area of 6,693 m², with 4,554 m² dedicated to production, 1,215 m² for warehousing, and 924 m² for office spaces. This state-of-the-art plant is a hub for manufacturing premium automotive upholstery, handling everything from pattern making to final assembly.

Production Capacity

4,261,326

pcs

Since joining the Prevent Group in 2016, Žepče has quickly established itself as a leader in automotive seat cover production, consistently meeting the highest standards for major automotive brands.

Skilled Workforce

90
employees

The facility currently employs 90 highly qualified professionals, with plans for further expansion to meet increasing demand in the future.

Our Portfolio

The facility has successfully produced seat covers for a wide range of vehicles, including the VW Golf A7, Passat B8, Audi A4, Škoda, and Land Rover. Additionally, Žepče's ability to manufacture high-quality motorcycle jackets and pants for Dainese, as well as specialized covers for global brands like Starbucks and IKEA, showcases the facility's versatility in serving industries outside of automotive.

In 2023, Žepče embarked on exciting new projects, such as collaborating with Moon Boot and producing for other high-end clients like Aquinos, Sinergy, and UF PRO.

With a proven track record in automotive, the facility continues to grow and diversify, forming lasting partnerships with companies such as Hoffbrucker, Interstuhl, Keter, and Affenzahn.

Expertise Technology

Our production facilities stand as pillars of expertise, blending years of experience with cutting-edge technologies.

Both facilities excel in a variety of critical manufacturing processes such as sewing, hand-cutting, leather perforation, and assembly. This diverse knowledge base is what enables us to meet the demands of some of the most renowned global automotive brands and other high-end industries.

At Goruša, precision is at the core of our production capabilities. We utilize CNC machines from leading manufacturers like Bullmer and Lectra for cutting, ensuring the highest accuracy and efficiency in every step. These machines are complemented by Durkopp Adler sewing machines, known for their precision and reliability in stitching.

Whether it's sewing automotive seat covers or creating complex non-automotive items, our technology guarantees top-tier results every time.

Similarly, in Žepče, our facilities embrace a variety of processes, including the sewing of seat covers in fabric and leather, and the assembly of both materials to produce high-quality products. We also specialize in sewing for the furniture sector, producing stylish, durable pieces that meet industry standards. Our state-of-the-art sewing technology and experienced workforce allow us to maintain consistency and precision throughout production.

Capabilities and Versatility

We are are fully equipped to handle large-scale production demands while maintaining flexibility to diversify.

While automotive upholstery remains our primary focus, we are not limited to just this. Our diverse expertise enables us to take on a wide range of manufacturing projects, from motorcycle gear to furniture upholstery, and even child seat covers.

Automotive Upholstery

High-quality seat covers for a range of vehicles, from luxury cars to motorcycles. We have worked with world-renowned brands such as Ford, Renault, Hyundai, and Dainese, ensuring that our products meet the highest standards of comfort, durability, and design.

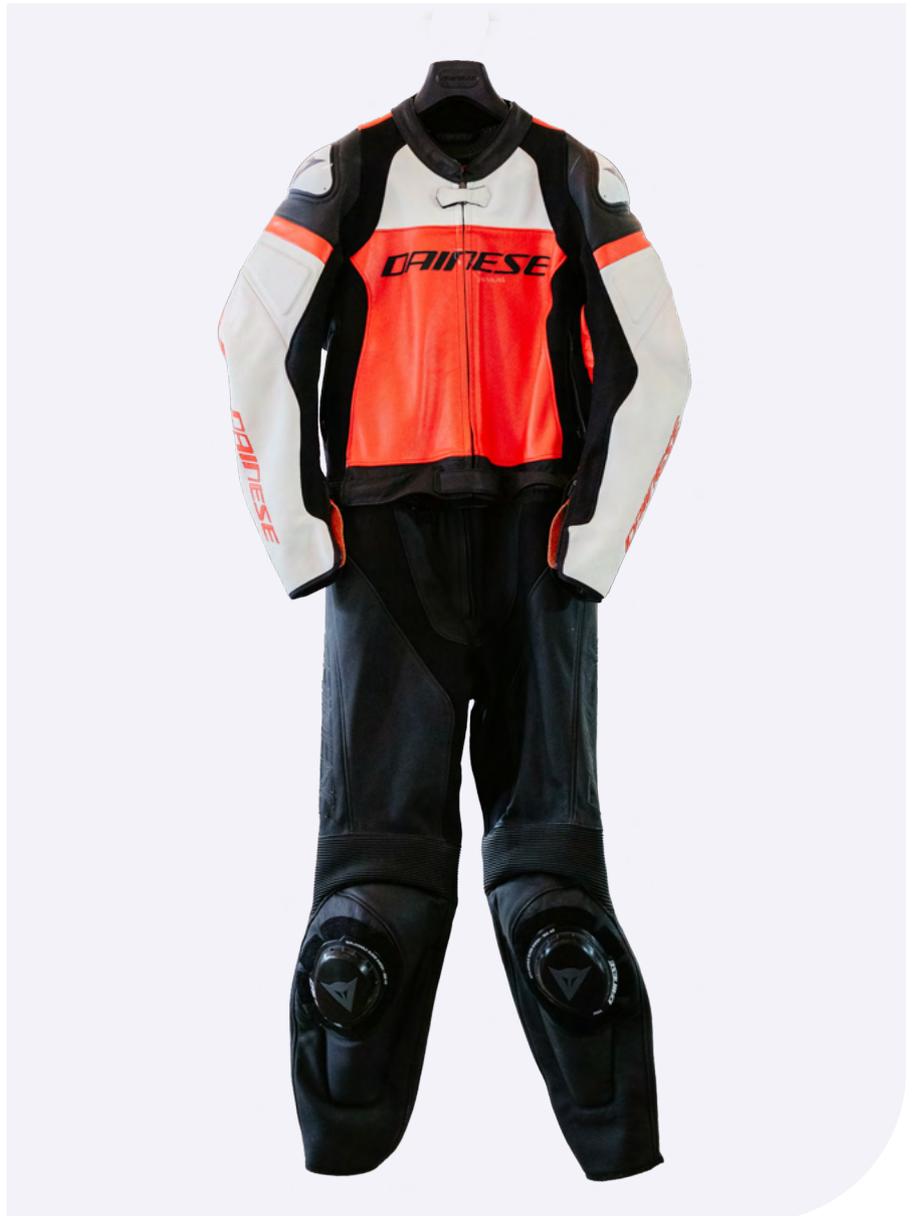

Non-Automotive Production

Beyond automotive, we have a proven track record in producing custom items such as motorcycle gear, furniture, and child seat covers. Our adaptability means we can serve a variety of industries, creating bespoke products that meet the unique requirements of each sector.

Cutting and Sewing Services

Equipped with the latest CNC cutting machines, our team at Goruša and Žepče provides premium cutting services for a wide range of materials. From leather to fabric, our expert team ensures that all parts are cut to precision, creating the foundation for flawless assembly and sewing.

By combining advanced machinery with skilled craftsmanship, our facilities are able to meet the evolving needs of both automotive and non-automotive industries, allowing us to continually expand our capabilities and exceed client

expectations. Whether it's crafting seat covers for a global car brand or developing innovative solutions for non-automotive sectors, Goruša and Žepče are poised to deliver excellence across every project.

Commitment to Quality

**A trusted partner
for high-quality,
versatile
manufacturing
solutions.**

Choosing Prevent Sewing Automotive means partnering with a company that stands at the forefront of automotive upholstery and manufacturing services. With decades of expertise, state-of-the-art technology, and a versatile approach, Goruša and Žepče facilities offer a unique combination of reliability, precision, and flexibility.

Our teams are equipped with the latest CNC cutting and sewing technology, ensuring high-quality production for a range of industries. Whether it's automotive seat covers or custom non-automotive products, Prevent Sewing Automotive

adapts to meet the diverse needs of our clients. Our commitment to innovation and excellence allows us to consistently deliver superior products that meet the highest standards of design and durability.

Additionally, both Goruša and Žepče hold the prestigious **IATF 16949** certification, underscoring our commitment to quality management and our adherence to global standards in automotive manufacturing. This certification guarantees that our processes are optimized for efficiency, quality, and continuous improvement, ensuring that every product we deliver exceeds industry expectations.

Conclusion Contact

By choosing Prevent Sewing Automotiv, you gain a trusted partner that not only understands the complexities of the automotive and non-automotive industries but also prioritizes customer satisfaction, precise production timelines, and long-term collaboration.

Our proven track record with major global brands speaks for itself, and we are ready to take your projects to new heights with the quality and precision that only Prevent Sewing Automotiv can offer.
