In the Spotlight

The Division of Graduate Education in Biomedical Sciences (GEBS) is proud to recognize **Eric Warren II**, a student in the **Master of Science in Biotechnology** program, Spring 2026 Cohort 14. Eric is completing the General Biotechnology track and is expected to graduate in December 2026.

Eric's scholarly and professional work sits at the intersection of technology, public health, and health equity. His recent accomplishments include co-authoring and presenting the poster, "Encoding Equity: The Health Equity Tracker's SEED Program as a Model for Expanding Access to Technology Careers While Advancing Health Data Justice," at the 2026 Daniel S. Blumenthal, MD, MPH Public Health Symposium at Morehouse School of Medicine.

He also co-authored "Understanding Geospatial Disparities in HIV Care and Prevention: Insights from the Health Equity Tracker," presented at the 2025 American Public Health Association Annual Meeting in Washington, D.C.

In addition to his academic presentations, Eric authored the reflection, "Equity in Every Room: Reflections from the 2026 Blumenthal Symposium", published by the Satcher Health Leadership Institute. In the article, he reflects on the importance of developing equity-centered technology that makes health-disparity data accessible and supports meaningful change within communities.

Eric's accomplishments exemplify the type of interdisciplinary scholarship, innovation, and commitment to service that GEBS strives to cultivate in its students. Through his work, he demonstrates how biotechnology, data, and technology can be used to advance health equity and help address real-world public health challenges.

Please join us in celebrating Eric Warren II for his continued scholarly contributions and dedication to advancing health equity. We are proud of the work he is doing and look forward to seeing the impact he will continue to make.
